

ITU-D Workshop on Next Generation Networks
Sept-Oct 2003 Doha, Q atar

Brief resume of Krishna Sirohi

Krishna Sirohi has completed his Masters in Engineering from premier institute in India, called Indian Institute of Science (I.I.Sc.) at Bangalore India in 1988. Since 1988, he is contributing to major technology development programs in the area of civil and defence communication systems in India. He is currently head of the mobile technology development program at Centre for Development of Telematics (C-DOT), Telecom Technology Development Centre of Government of India. C-DOT has revolutionised the telecommunication scenario, with the induction of 25 million telephone lines (50% of Indian PSTN/ISDN) with IN based valued additions (100% of Indian Network) in entire Rural & Urban India. C-DOT technology mission of India is a successful model of telecom technology for masses.

Krishna Sirohi is Vice-Chairman, ITU-T's Special Study Group on "IMT2000 & Beyond Systems". He has contributed in WTSA-2000 in formation of SSG by given technical inputs on behalf of developing nations and has lead the study of fixed mobile convergence in SSG.
