22 de Noviembre de 2022

A futuristic scene set in a dark, space-like environment. In the foreground, a large, glowing orange sphere with a textured surface dominates the right side. In the background, two people are seated at a long, dark console. One person is holding a glowing yellow sphere. The floor is covered in a grid of blue dots and lines, suggesting a digital or virtual space. The overall atmosphere is high-tech and immersive.

Building the Metaverse

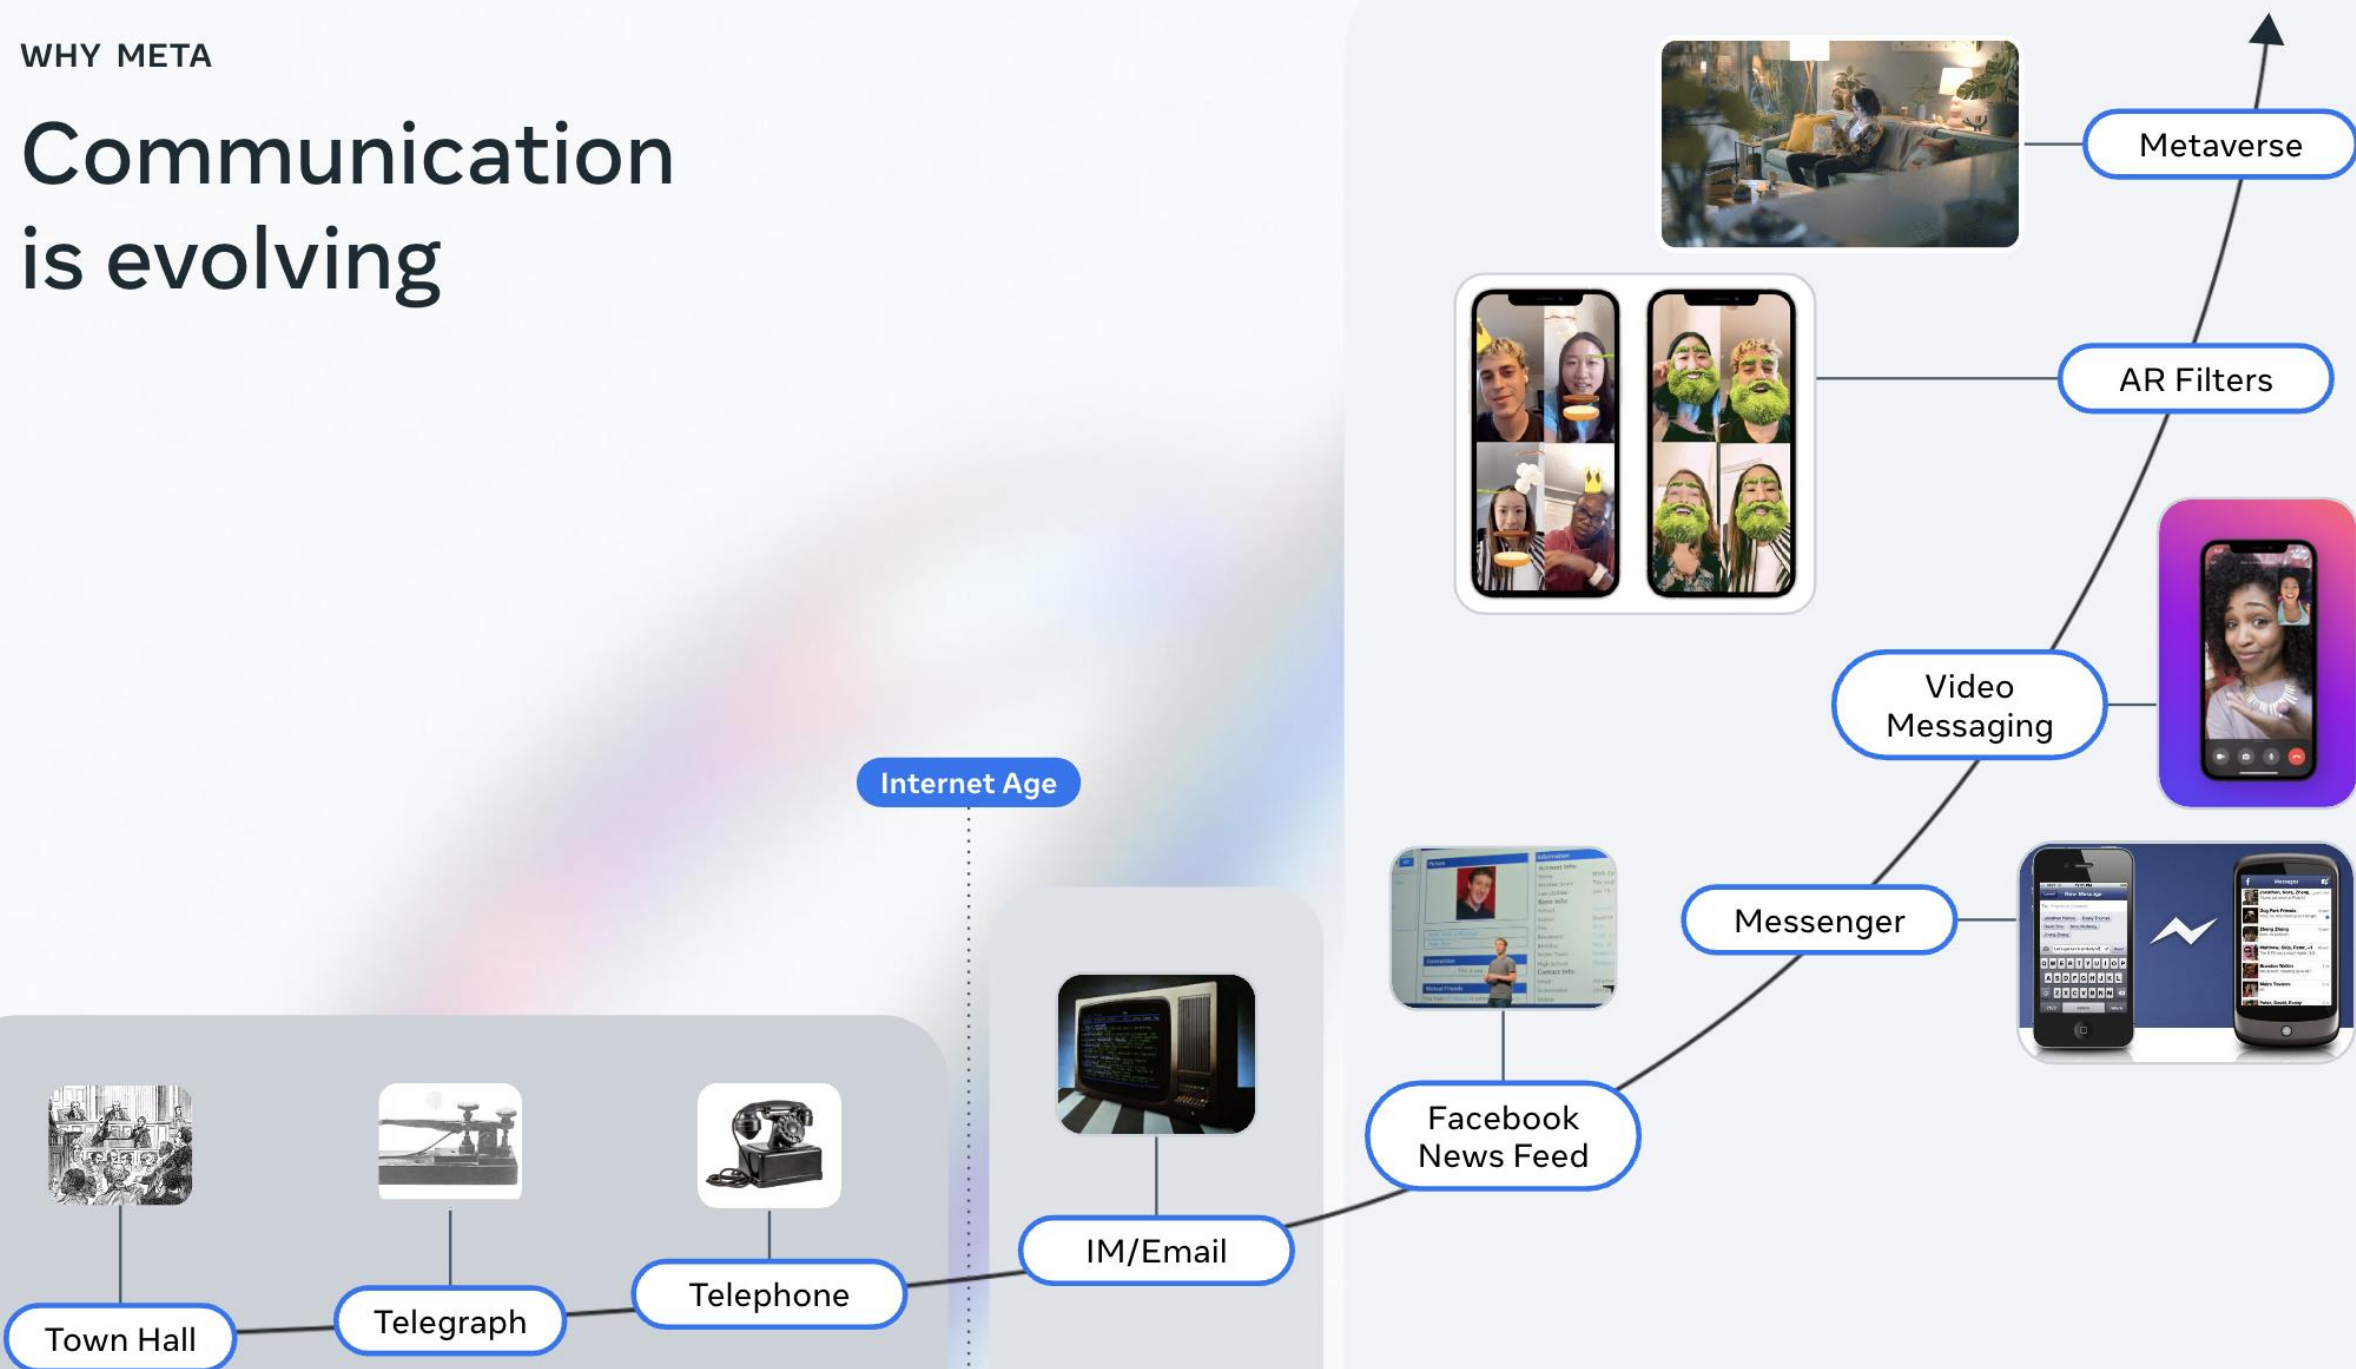

The next stage of social technology

Technology allowed us to talk, then write and now see each other. The metaverse will be the next step— enabling us to feel like we are sharing a space together.

WHY META

Communication is evolving

Nuevas Tecnologías: AR/VR

 Physical world

 Augmented reality

 Virtual reality

BUILDING THE METAVERSE

“The metaverse will provide a persistent, synchronous environment where people can be together—a hybrid between the social platforms that we see today, but an environment where you’re embodied in it.”

“It’s going to be accessible across all of our different computing platforms: VR and AR, but also PC, mobile devices and game consoles.”

Mark Zuckerberg
President and CEO, Meta

BUILDING THE METAVERSE

Technology

Portal

Become a leader in **building meaningful human connections** through the best of our technologies.

Quest

Evolve Quest from a gaming console to a **new kind of computer**, with the potential to transform the way **1 billion people play, work and communicate.**

Augmented Reality

Spark AR is the world's **most used** augmented reality platform.

Smart Glasses

In partnership with Ray-Ban, we recently launched our **first generation of smart glasses**, our initial step toward AR glasses.
