Smart Learning

PROPOSED PROJECT-7

"Promoting Smart Learning in Five Arab Countries"

Committed to connecting the world

ITU International Telecommunication Union

PROJECT OVERVIEW

Project Name: "Promoting Smart Learning in Five Arab Countries"

Project Location (s): Countries in the Arab Region

Project Expected Duration: 3 years

Project Contact Information: karim.abdelghani@itu.int

PROPOSED PROJECT BRIEF DESCRIPTION

The aim of this project is to provide assistance to five countries in the Arab region on formulating their national strategy on Smart Learning in addition to transforming five schools in each country as a pilot in implementation of the adopted national strategy. This regional project will be implemented with a multistakeholder approach in line with the Arab Regional Initiative Smart Learning Initiative. Furthermore, the selected countries will be based on a the received requests for assistance from the countries in the region. The ITU already received an official request from Palestine and so it will be the first country to receive this assistance.

International
Telecommunication
Union
