

ITU KALEIDOSCOPE

ONLINE **2021**

6-10 December 2021

**Exploring the Essence of
Communication to Reach the
Heart**

Takeshi Yamada

NTT Communication Science Laboratories

takeshi.yamada@ntt.com

Day 4 – Thursday, 9 December 2021

(Time zone - UTC+1)

12:00-12:30

Keynote session

NTT R&D organization

2,300
researchers

\$1.0 billion
invested

18,000+
patents granted

10 consecutive years
Received Derwent Top 100
Global Innovators by Clarivate
Analytics

The mission of NTT Communication Science Laboratories

Human

Brain

Communication that reaches the heart

Media

Knowledge

SpeakerBeam: Computational selective listening based on deep learning

Humans are good at selective listening.

SpeakerBeam

The voice of the target speaker can be extracted simply by teaching the characteristics of the voice.

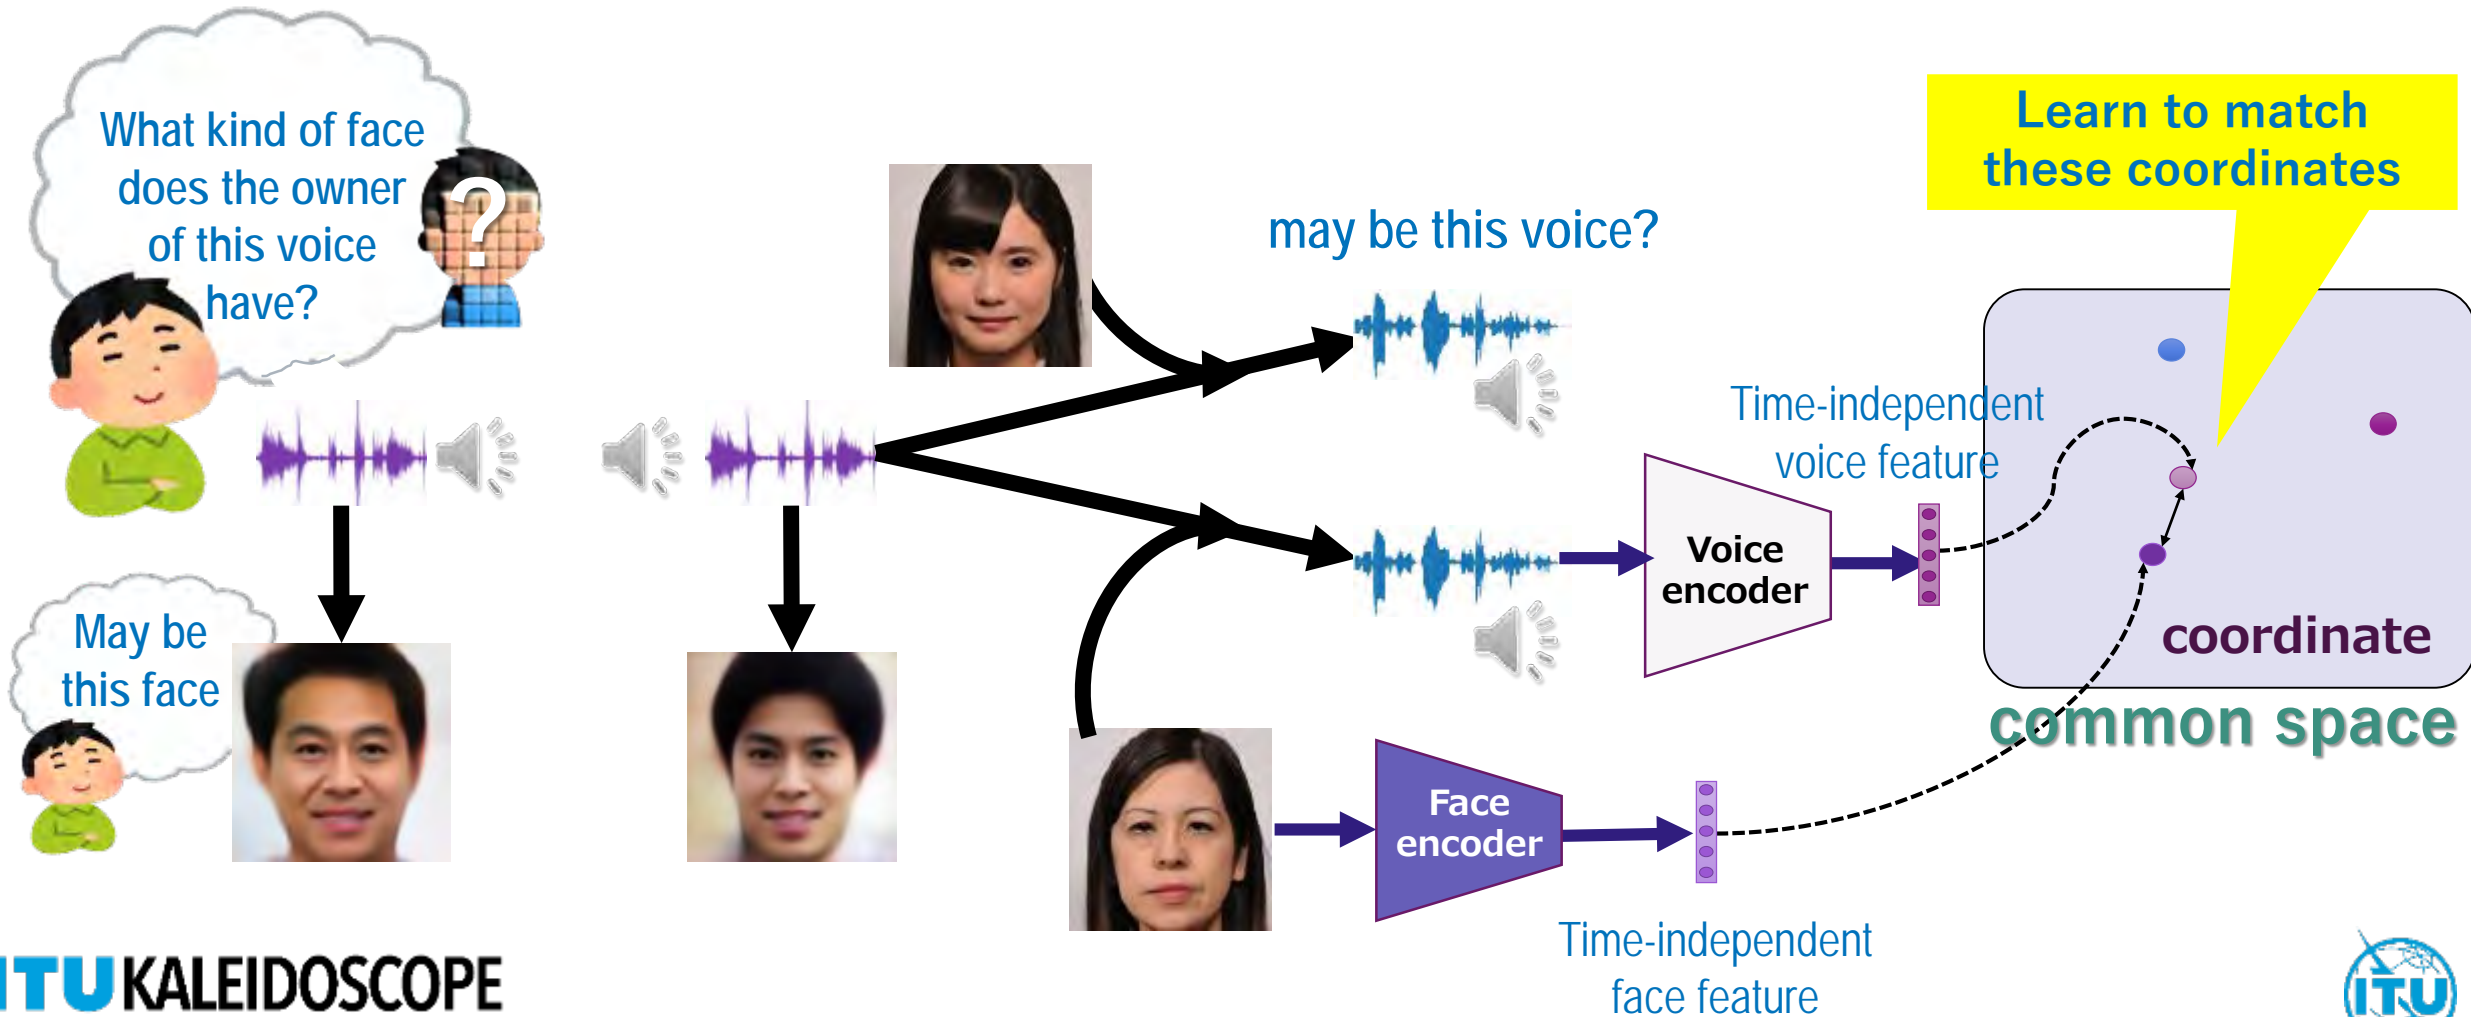

Voice Conversion: Converting impression and intelligibility of speech

It not only makes communication smoother but also creates new forms of communication that extend human vocal and auditory functions.

Cross-modal voice conversion

Building common space by multiple encoders for concept acquisition

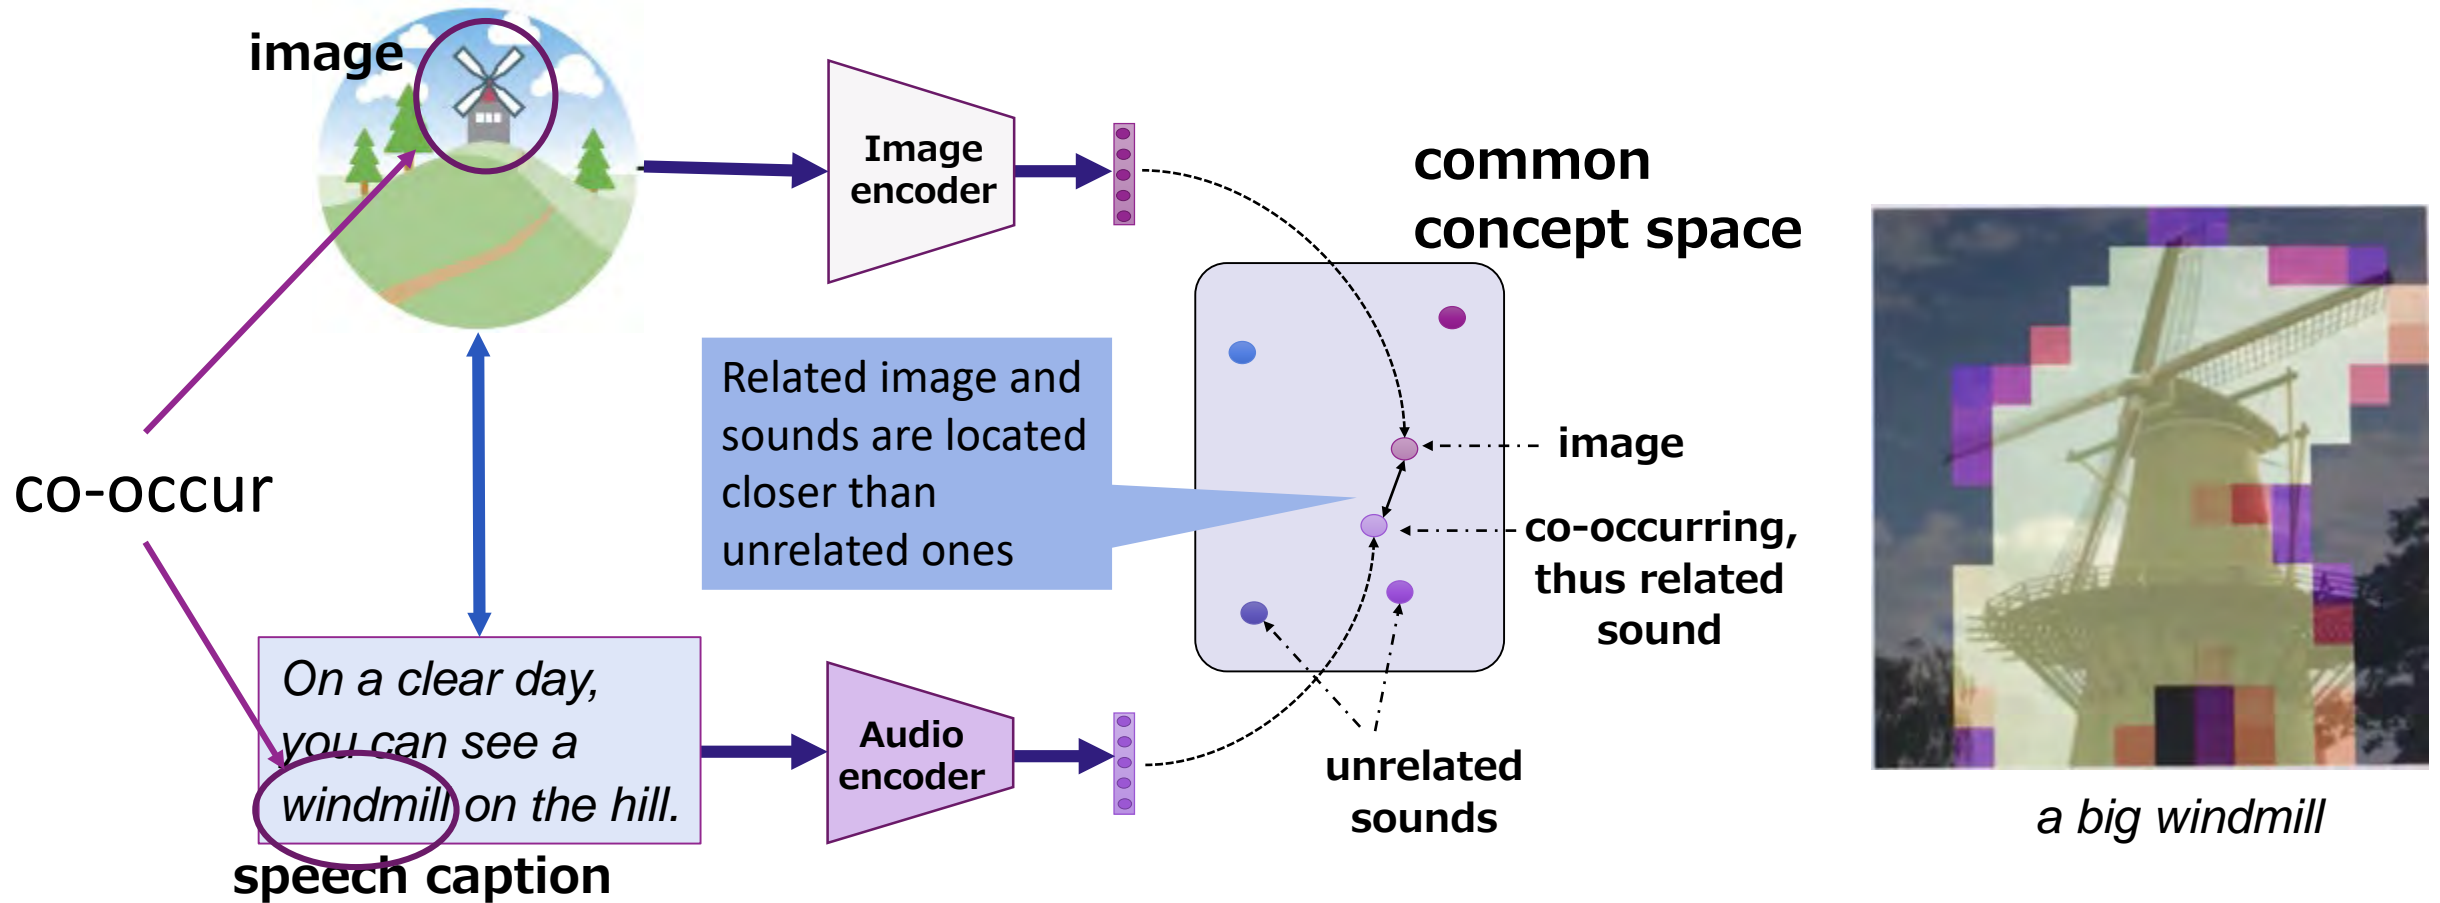

Image object and word originating from the same 'thing' tend to co-occur in many samples.

Tele-stethoscope

A doctor can listen to sounds coming from various parts of the patient's body.

conventional stethoscope

Patient

network

Doctor

no direct physical contact with the patient

An examination vest is equipped with multi-channel* acoustic sensors.

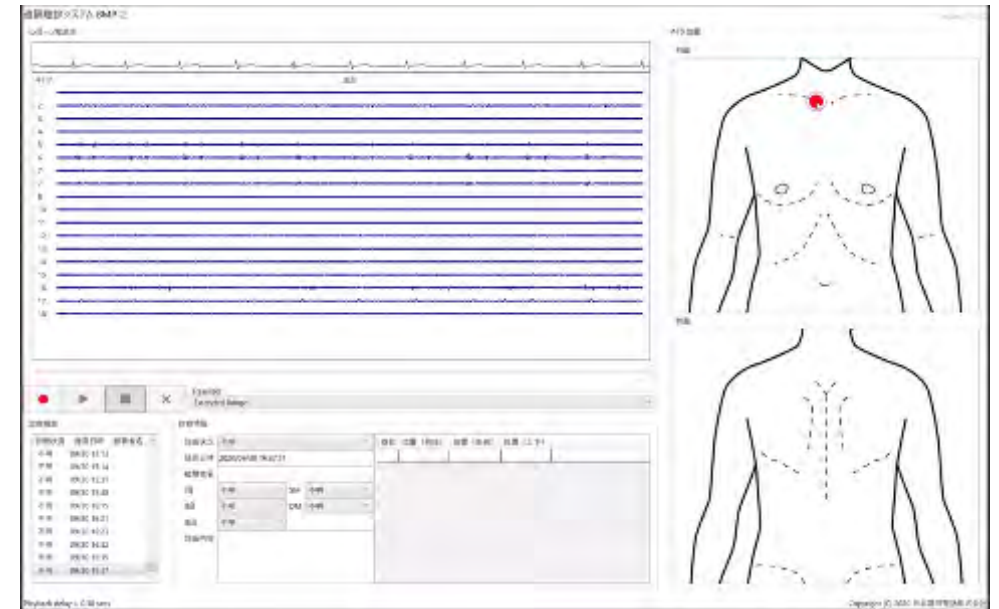

Examination Vest front

back

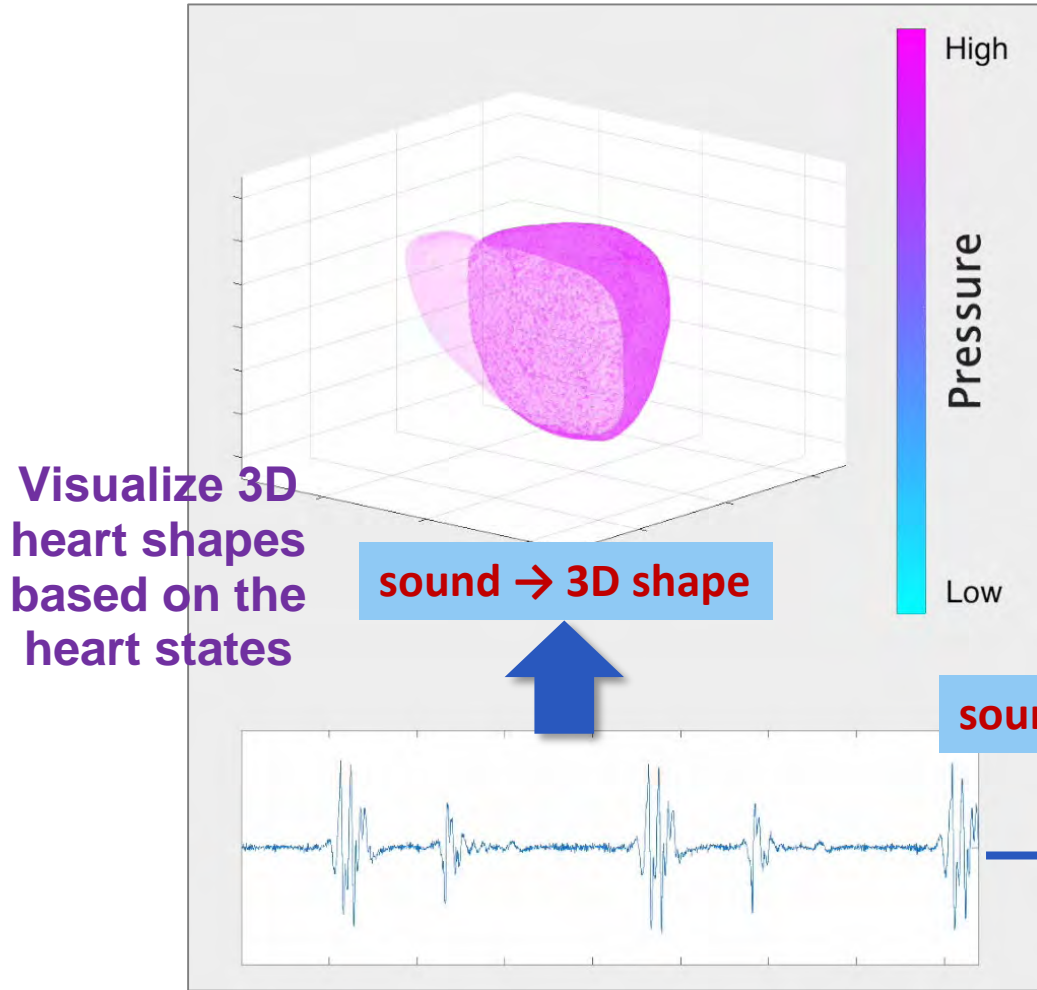

sensor

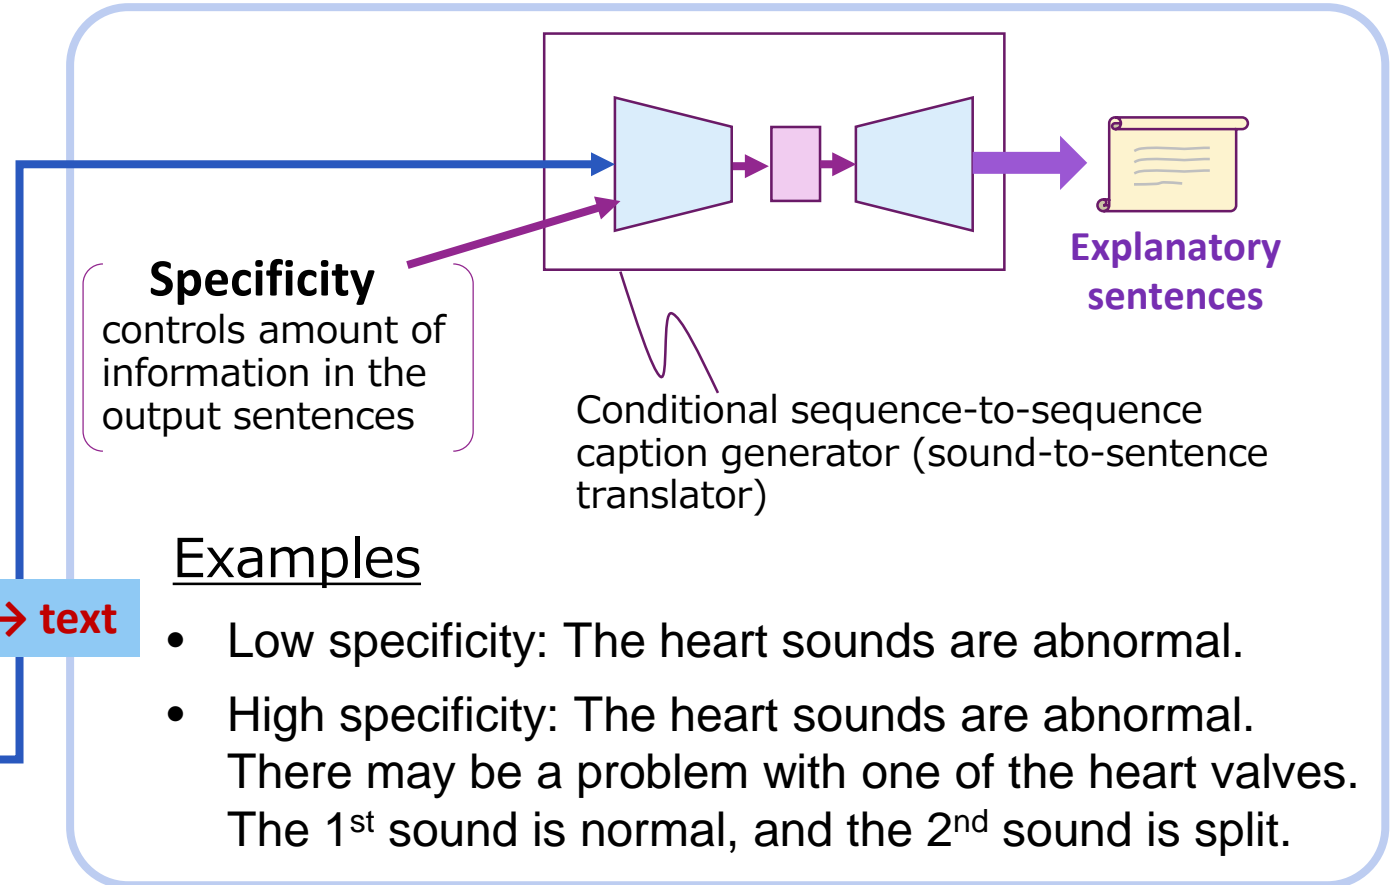

*18 acoustic channels and 1 electrocardiogram (ECG) channel

From tele-stethoscope to AI stethoscope

Explain the meaning of the sounds in text

Remote Haptic Communication

Vibrotactile Telephone Lite

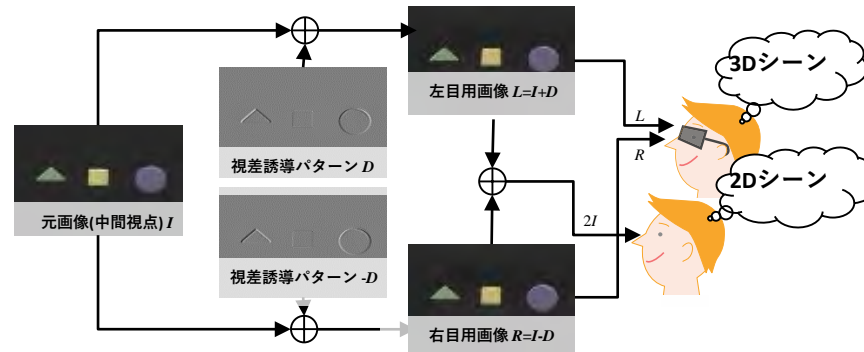

Ultra-Future Sensory Public Phone

Implementing perceptual illusions into the real world

変幻灯 Hengento (2015)

HiddenStereo (2017)

ぶるナビ 1 Buru-Navi 1 (2007)

ぶるナビ 4 Buru-Navi 4 (2017)

浮像 Ukuzo (2018)

Danswing Papers (2019)

Velvet hand illusion (2021)

Language development of infants

Picture books supervised by NTT CSL have achieved **280,000** copies in total.

mon · key ⇒ monkey

Do human infants autonomously learn from the co-occurrence of phenomena in the natural world?

理解			発話		
順位	項目	月齢	順位	項目	月齢
1	自分の名前	6.95	1	いないいないばー	14.15
2	バイバイ	8.69	2	まんま	14.34
3	いないいないばー	9.20	3	ママ	15.38
4	おいで	9.42	4	わんわん(犬)	15.49
5	ママ	9.76	5	はい	16.34
6	まんま	9.94	6	パパ	16.54
7	ちょうだい	10.19	7	あっ	16.80
8	どうぞ	10.22	8	バイバイ	16.83
9	おっばい	10.38	9	あーあ	16.93
10	あーん	10.42	10	アンパンマン	17.83
11	いただきます	10.51	11	イヤ	18.10
12	パパ	10.85	12	ねんね	18.17
13	抱っこ	11.17	13	ぶつぶー(車)	18.32
14	ごちそうさま	11.26	14	にやんにやん	18.46
15	ごはん(食事)	11.30	15	あーん	18.78

child vocabulary development database

Printed books stimulate five senses

Personalized Picture Book

Designed by Akio Kashiwara and NTT Print Corp.

Target Age: 1-2 years of age

Enter information about a child at:
<https://ehon.nttprint.com>

- child's name and gender
- favorite objects
- vocabulary checklist

1. A main character is set to match the child's name and gender

Hiro-kun (boy)

Aki-chan (girl)

2. The story is customized to match the child's interests

Dog story

Elephant story

3. Words with pictures that the child is just about to learn are selected

elephant

ant

ladybug

butterfly

cat

monkey

Conclusion

What it means to be a human? is an ultimate question

Study illusions provide important clues to understanding the brain functions of humans

The way we interact with other people is changing

COVID-19

Pursue the possibilities of new communication media

Technologies are approaching toward human intelligence

Challenge the technical limits toward approaching human intelligence

Reach out and touch someone's heart
