Abstract: This liaison statement provides advice on the definitions proposed in E.td-dr and E.sup.fdr

The CCT (which is composed by SCV, CCV and ITU-D representatives) thanks ITU-T SG2 for its liaison statements SG2-LS66 and SG2-LS67, whereby SG2 requests advice from SCV and ITU-R SG5 with respect to the new definitions proposed in draft Recommendations E.td-dr and E.sup.fdr.

After careful consideration of the definitions, and noting that some of these are already in the terminology database, the CCT requests SG2 to consider using the definitions already provided in the terminology database (itu.int/go/terms), and to follow the guidance given in Annex B of the Author's Guide, as applicable.
