

Connecting the Caribbean and the Americas:

**List of Areas for possible Regional
projects**

Single Development Vision

- *A full-employment economy*
- *A decent standard of living & quality of life for all citizens*
- *Elimination of poverty*
- *Adequate opportunities for young people*
- *Spatially equitable economic growth within the Community*

Single Development Vision 2/2

- *Social equity, justice, cohesion, personal security*
- *Environmental protection, ecological sustainability*
- *Democratic transparent, participatory governance*
- *‘Girvan Report, Towards a Single Economy, 2007’*

Role of the CARICOM Secretariat

- Principle administrative and technical arm of the Caribbean Community.
- Strategies, plans
- Ensure harmonisation of most regional initiatives
- ICT – mandated to coordinate all activities related to ICT and the development of the CARICOM Information Society.
- Not responsible for implementation.

Regional organisations /institutions

- All other regional organisations formed by the Secretary General – CARICOM (on mandate from Heads)
 - CTU
 - CDEMA
 - CRITI
 - CARICAD
 - CKLN
 - CROSQ
- **CANTO not a CARICOM** entity but active partner in ICT initiatives

Strategy as Base

- Regional Digital Development Strategy (RDDS):
 - *Access, connectivity and Internet governance*
 - *Capacity-building and sustainability*
 - *Business, trade, culture and disaster management*
 - *Policy formulation and the legal and regulatory framework for implementation*
 - *ICT4D statistics*

Context

- ***New Economy: Information Society/Knowledge Economy***
 - ***Inclusive and Collective***
 - ***Collaborative digital environment***
 - ***People empowered by the availability of information***
 - ***People generate knowledge through interaction.***

Strategic Development Outcomes Include:

Challenges

- CONNECTIVITY
- CAPACITY
- CONTENT
- COMMUNITY
- COMMERCE
- CAPITAL
- Formal Access vs. Effective Access

Challenges

- Education
- Aged/Aging population
- Fragmented harmonisation
- Public sector in need of reform
- Private sector which has not lead innovation
- Sectors which need innovation
- International Aid – becoming non-existent (sectoral, ‘siloed’, have not re-profiled)
- Climate change

Regional imperatives

- **Collaborative leadership/governance** *(rationalise overlapping functions of multiple agencies)*
 - **Research and Innovation** *(application supporting sustainability)*
 - **Key social & Economic development measures** *(ICTs providing a supportive environment in communities, lifelong learning, business, government)*

List of Areas

- Women and Children in ICT (Education / capacity Building)
- Regional organisations as key organisms for the Regional System
- Preserving (and capitalising from) our Caribbean Cultural heritage
 - Cultural Diversity
 - Innovation
- Exploiting Open Source as a key enabler for Regional Trade –in-Services
- Climate Change
- Measuring the Caribbean Information/Knowledge Society

Capacity Building: Women and Children

- Regional programme
 - Database with biographical data
 - Link with School Mgmt systems
 - 2-5 year programme – Capacity Building
 - Harmonised Basic IT literacy Course (Regional) – online testing and certification
 - Build specific learning ‘Bundles’
 - Form a Women and Girls Regional chapter (supported by National Chapters)
 - Chapters would be responsible for managing the training programmes in each country (women, boys and girls)
 - Opportunity to do case studies with different types of learning technologies and tools
 - Entrepreneurial training included for the women (Using Internet) ~ community access centres
 - ~reinforce that tech. Tools could be tools of development not just toys

Capacity Building: Women and Children

- Regional programme:
 - Technology literacy (Skill based)
 - Knowledge deepening (ICT in problem solving)
 - Knowledge creation(problem solving and creating solutions)
 - Digital Citizens
 - Disadvantaged and underserved
 - Knowledge Workers
 - Targeted Government, Private sector
 - Specific skill sets and applications (project management,
 - Opportunity for new applications (IT department may become business application arm)
 - Policy & Guidelines (Digital Content Project)

Sustainability for the Knowledge society

- Linking the Secretariat's (information space) – OECS, ACS, CCS, SELA
- Application:
 - **CARICOM at a glance** *
 - Technology in the Hands of our leaders
 - CSME, News, Schedules
- Plus National Governments – Single Information space
 -
 - Strategy for: outsourcing info- management, info-sharing
 - Utilising new technologies (e.g. Cloud)

Preserving our Caribbean Cultural heritage

- Cultural Diversity
 - Digital local language library
- Case Studies
- Legislation Project
 - Audiovisual and Media policies
 - The sector includes motion picture and video tape production ~ and sound recording (WTO 2000).
 - Questions : what is broadcasting?
 - Changes : analogue to digital
- Innovation

Preserving our Caribbean Cultural heritage

- Digital Content Project
 - Establishment of Digital Content Consortium
 - Roadmap of information /knowledge assets
 - Digitally connected information producers
 - Preservation
 - Policies & **Standards**
 - Compilation of new knowledge products
 - Regional search engine (local languages)
 - Internet based directories

Exploiting Open Source as a key enabler for Regional initiatives

- Trade in Services
- Innovation
- Opportunities for ‘killer applications’
 - E.g. Health + Tourism + Agriculture + Transport

Single ICT CARICOM Space

- stimulating growth in the sector
- boosting competitiveness across the economy
- Bigger single market
- Consistent rules
- Single numbering plan
- Common spectrum space
- Promotes opportunities for research/innovation

Single ICT space

- Monitor development of and manage the region's ICT markets,
 - including wireless spectrum and other such assets as a regional collective .
- Establish Laws/regulations to support
 - competition liberalization,
 - sustainable living,
 - working practices, human rights,
 - trust (security)
- Determine policy on collective negotiation
 - reduced cost of technology and services, (incl. Landing rights)
- Lobby for treatment of the Region as one economic block for cost advantage.
- Benchmarking on regional 'standards'
 - E.g. Minimum Acceptable Bandwidth (Gov't, Business, Consumer)

Single ICT CARICOM Space

- Project which develops a road-map
 - Legislation
 - One 'area' code
 - New role for regulators (training ++)
 - One CARICOM copyright, domain name,
 - Revise Electronic Communications Regulatory framework
 - Radio Spectrum Management Strategy
 - Modernise the legal framework for audiovisual services
 - Promote interoperability, particularly in digital rights management
 - Develop Information /Knowledge Society Strategy
 - Common procurement

Other Projects

- Regional search engine
- ICT & Disaster Management & Mitigation
 - Health, Tourism, Agriculture
- ICT Youth Club
 - Collaboration
 - New enterprises
- ICT & Climate Change
 - Robustness (GIS mapping, social networks, mobile applications (e.g. integrating farmers – more national / regional produce)

Tracking Information/Knowledge Society

- Regional Info. Society Management Unit
 - Trends / Security risks
 - Policy
 - Marketing
 - News
- Regional Consortium on Statistics & indicators ~digitally linked to be an International
 - Training
 - Measuring right
 - **Census**
 - New indicators
 - Tracking core indicators (approx 200)
- Digital space for indicators (Private /public)
 - Partnership Core already developed
- Website for best/worst practices, case studies
- sub-committee on ICT Statistics and Indicators

Example : Access

Formal Access – Physical reach

- *Effective Access – Physical reach with impact, which considers:*

Financial affordability

User expertise

Ease of interface

Relevance of content

Funding

- Establish a funding model to include a dynamic marketing programme, with sector champions, driven focused leadership,
 - Benchmark the example, of the funding for HIV AIDS project (PANCAP) for the Caribbean
 - Increase efforts to attract major private national and foreign investments (for application of digital technologies) by developing a predictable enabling investment environment (new businesses, legal++)
 - Existing relationships (MOUs,
 - Re-profiling of our budgets
 - Targeted, strategic Proposals (Candidacy, venue)
 - Universal service Funds (as seed money?)

Thank you for your attention!
