

Fabio Leite

He is Project Manager, IMT-2000, in the International Telecommunication Union (ITU), acting as the ITU focal point for activities related to International Mobile Telecommunications 2000 (IMT-2000), including Global Mobile Personal Communications via Satellite (GMPCS). In this capacity, he is responsible for assisting ITU members by preparing strategic and policy options, proposals and plans related to IMT-2000 and for supporting the Union's activities relating to the development of international standards, regulatory and frequency spectrum studies for IMT-2000.

Before joining the ITU, he worked for EMBRATEL, Brazil, responsible for the communications system engineering unit of the BRAZILSAT project.

He has Bachelor and Master of Applied Science degrees in Electrical Engineering with specialization in telecommunications.
