

Provision of technical assistance

ITU promotes and offers technical assistance to Member States, in particular to developing countries, including LDCs, SIDS, LLDCs and countries with economies in transition, and regional telecommunication organizations, in the field of telecommunications.

ITU offers tailor-made projects and solutions for multistakeholder needs, with recognized long-standing technical expertise in the telecommunication/ICT field and comprehensive experience in project development, management, implementation, monitoring and evaluation, with a focus on results-based management. This also provides opportunities for public-private partnerships and a trusted platform to address development needs through the use of telecommunications/ICTs.

ITU also provides assistance for the implementation of decisions of world and regional conferences, as well as support for radio-frequency spectrum coordination activities among ITU members, and software tools to assist the administrations of developing countries to undertake their spectrum-management responsibilities more effectively.

In addition, ITU collaborates and cooperates with other United Nations bodies/agencies within the framework of their respective mandates.
