EU legal landscape on eAccessibility

European Commission
Information Society and Media

A variety of legal approaches

Focused on e-Accessibility (or even disability)	<ul style="list-style-type: none"> • US Section 508 	<ul style="list-style-type: none"> • US ADA
	<ul style="list-style-type: none"> • EU eCommunications • EU Terminal Equipment R&TTE • Medical Devices 	<ul style="list-style-type: none"> • EU Employment Equality Directive • EU Public Procurement
Makes references to e-Accessibility	For specific economic sector	Across all economic sectors

 European Commission
 Directorate-General for Industry and Media

Challenges for legislation

- **Effectiveness**
 - e.g. INCOM saw little progress since 2003 in eComms
- **Regulatory completeness** / internal coherence
 - e.g. standards, interoperability, conformity, monitoring
- **Fragmentation** of legislation / external coherence
 - Missing link networks – terminals; maze of 25 health / social care regulations
- **Not technology-neutral** or future-proof
 - Access to public phones – what about mobile?
- **White spots**
 - E.g. web accessibility
 - E.g. horizontal approach as in USA with ADA and Section 508

Mixed picture – what are success factors?

- **Legal parameters**
 - Definitions and scope of obligations vary across MS
 - EU law interpreted (and complemented) differently
 - Horizontal vs. sector-specific responsibilities
 - Range of implementation mechanisms; key for success
 - Importance of contextual factors
 - Important levers: procurement, public sector obligations
- **Implementation issues**
 - visibility / importance of eAccessibility
 - presence / absence of “champions”
 - characteristics of the national legislative / regulatory environment, etc.
