Proposed title: "ITU-T NGN GSI: requirements and main achievements in ITU-T NGN Release 1 Standardisation"

Abstract: "This presentation provides an overview of key requirements and capabilities from the perspective of users and service providers for the support of NGN services. Starting with an introduction to the main objectives of NGN Release 1, main achievements of the ITU-T NGN Global Standardisation Initiative are examined in some key areas. Driven by high market expectations for new and enhanced service features in NGN, some major topics for future standardization work in the service and capabilities areas are finally introduced."
