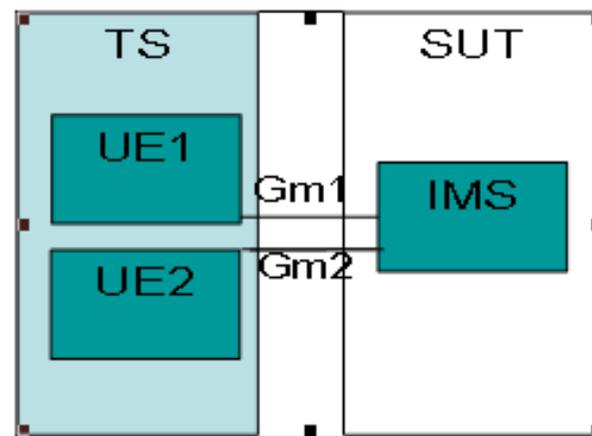

Figure 2: Test configuration CF\_2Gm

# IMS conformance testing

## TSS/TP phase :

- Test Suite Structure

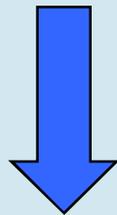

1. Test purposes for the Gm interface only
  - 1.1. General
  - 1.2. Registration procedures
  - 1.3. Initial dialog request procedures
  - 1.4. Standalone requests procedures
  - 1.5. Subsequent requests on a dialog procedures
  - 1.6. Target refresh request procedures
  - 1.7. Emergency procedures
  - 1.8. Exceptional procedures
  - 1.9. SDP procedures
  - 1.10. NAT traversal procedures

# IMS conformance testing

## TSS/TP phase :

- Test Purposes

- Standardization documentation

- Generation of document with test structure and test purposes

# IMS conformance testing

## RFC3261 + ETSI TS 124 229

When the P-CSCF receives any 1xx or 2xx response to the above request, the P-CSCF shall:

- 1) store the values received in the P-Charging-Function-Addresses header;
- 2) store the list of Record-Route headers from the received response;
- 3) store the dialog ID and all the headers involved in the session

4) in the response protected server P-CSCF and either

- a) the P-CSCF FQDN established from the response
- b) the P-CSCF IP address from the response

NOTE 4: The P-CSCF shall be tested on each port, with each pair of values see 3GPP TS 24.229

- 5) if the response contains a Record-Route header field value, the P-CSCF shall store the session ID if needed

before forwarding the response to the UE as defined in RFC 3261 [26].

Test Purpose					
<b>Identifier:</b>	TP_IMST2_GM_INI_04				
<b>Summary:</b>	When a P-CSCF receives any valid SIP 2xx response as a result of a forwarded request for an initial dialogue, it forwards the response to the originating UE				
<b>Clause:</b>	5.2.6.3 second numbered list, 5.2.6.4 second numbered list				
<b>References:</b>	RQ_003_5047, RQ_003_5055	<b>Config Ref:</b>	CF_2Gm

**Good to check code with different compilers!!!**

# IMS conformance testing

## ATS phase :

Building blocks of a TTCN-3 Test Suite

### Test Suite

#### Test Data Types

#### Data types which specify

- Structure of messages or calls and their information elements (fields, parameters)
- Internal data structures (e.g., for computation)
- Possibly encoding or display information

#### Built-in basic types

*integer, boolean, float,  
bitstring, hexstring, octetstring,  
charstring, universal charstring*

#### ... and structured types

*record, record of, set, set of  
union, enumerated*

#### ... and special types such as

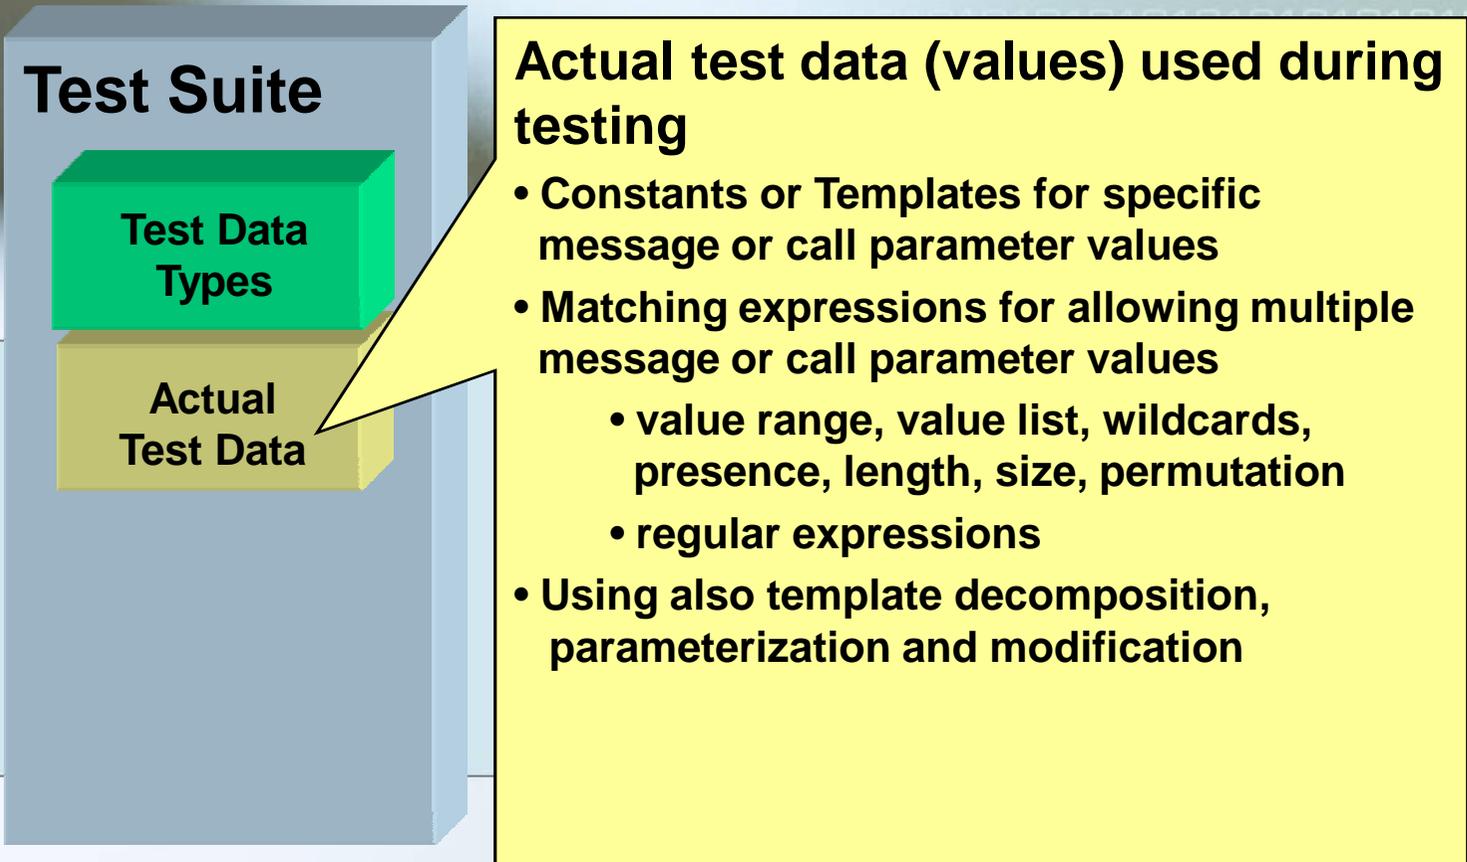

*component, port, verdicttype, default,  
synchronizations, etc*

# IMS conformance testing

## ATS phase :

Building blocks of a TTCN-3 Test Suite

### Test Suite

Test Data  
Types

Actual  
Test Data

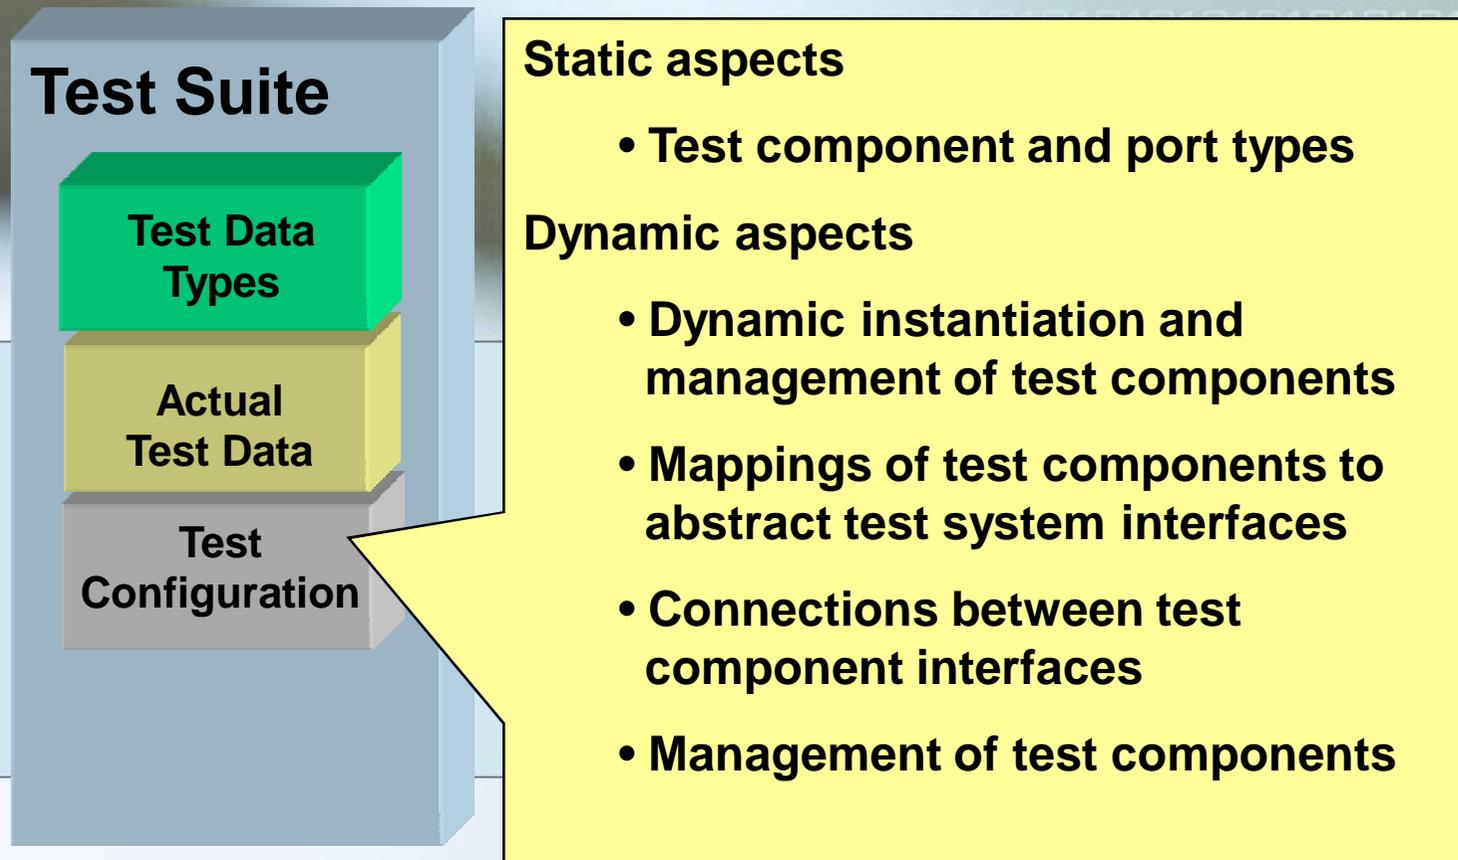

### Actual test data (values) used during testing

- Constants or Templates for specific message or call parameter values
- Matching expressions for allowing multiple message or call parameter values
  - value range, value list, wildcards, presence, length, size, permutation
  - regular expressions
- Using also template decomposition, parameterization and modification

# IMS conformance testing

ETS phase :

- TS tool

The screenshot shows the TTCN-3 Execution Management interface. The main window displays a list of test cases in the 'Test Case' view, with 'TC\_IMST2\_GM\_INI\_04' selected. The 'Parameters View' shows a tree structure of parameters, including 'ModuleParameters', 'SIP\_PIXITparameters', and 'ISUPinterworkingParameters'. The 'EXECUTION MODE' label points to the top right of the window. The 'TEST RUN' label points to the 'Execute' button in the toolbar. The 'TEST CASE' label points to the selected test case in the list. The 'TEST PARAMETERS' label points to the 'Parameters View'.

Test Case	Runs
TC_IMST2_GM_REG_09	1
TC_IMST2_GM_REG_10	1
TC_IMST2_GM_REG_11	1
TC_IMST2_GM_INI_01	1
TC_IMST2_GM_INI_02	1
TC_IMST2_GM_INI_03	1
TC_IMST2_GM_INI_04	1
TC_IMST2_GM_INI_05	1

Parameter tree structure:

# IMS conformance testing

ETS phase :

The screenshot displays the TTCN-3 Execution Management interface. On the left, the 'Test Case' list shows 'TC\_IMST2\_GM\_INI\_04' selected. The 'Parameters View' shows various test parameters. The 'Test Data View' (indicated by a large arrow) shows a table with columns 'Name' and 'Value'. The 'Data' table shows a 'REGISTER\_Request' object with fields like 'method', 'uri', 'name', 'info', 'port', 'host', 'portField', and 'parameters'. The 'Graphical View' (indicated by another large arrow) shows a sequence diagram with participants MTC, SYSTEM, component5, and component6. The diagram includes messages like 'send REGISTER\_Request', 'receive', and 'match'. A timeline on the left of the diagram shows timestamps from 11:12:35.869 to 11:12:36.076.

Name	Value

requestLine	
method	REGISTER_E
uri	
name	sip
info	omit
port	
host	imscore.iskratel.net
portField	omit
parameters	omit

Sequence Diagram Participants: MTC, SYSTEM, component5, component6

Sequence Diagram Messages:

- SYSTEM to MTC: tc\_sync(120.0)
- SYSTEM to component5: send REGISTER\_Request
- component5 to SYSTEM: tc\_resp(15.0)
- SYSTEM to component6: send REGISTER\_Request
- component6 to SYSTEM: tc\_resp(15.0)
- SYSTEM to component5: receive
- SYSTEM to component6: receive
- SYSTEM: match Response: mw\_Response\_Base
- SYSTEM: tc\_resp(0.116)

# IMS conformance testing

ETS phase :

The screenshot displays the TTCN-3 Execution Management interface. On the left, a 'Test Case' list shows 'TC\_IMST2\_GM\_INI\_04' selected. Below it, the 'Parameters View' shows various SIP and SDP parameters. The main area is divided into 'Expected TTCN-3 Template' and 'Data' sections. The 'Data' section shows a 'Response' object with fields like 'sipVersion', 'statusCode', and 'reasonPhrase'. The bottom part of the screen shows a 'TTCN-3 Graphical Logging' window with a call flow diagram. Three large blue arrows point to specific elements in the call flow: 'TEMP VERDICTS' points to a 'pass' node, 'MATCHING' points to a 'match' node, and 'SINCHRONIZATION' points to a 'syncPort' node.

Name	Value
Response	
statusLine	
sipVersion	SIP/2.0
statusCode	200
reasonPhrase	OK
msgHeader

# IMS conformance testing

ETS phase :

The screenshot displays the TTCN-3 Execution Management interface. On the left, a 'Test Case' list shows 'TC\_IMST2\_GM\_INI\_04' selected. Below it, the 'Parameters View' shows various test parameters. The main console window displays the raw SIP INVITE message data, including headers like 'Call-ID: 82996274@172.27.10.1' and 'Content-Type: application/sdp'. A large blue arrow labeled 'MESSAGE DATA' points to this console output. At the bottom, the 'TTCN-3 Graphical Logging' window shows a sequence of events, including synchronization points and a final 'pass' verdict. A second large blue arrow labeled 'FINAL VERDICT' points to the 'pass' status in the logging window.

TRACER CHECK

The image shows a Wireshark network traffic capture window. The main pane displays a list of captured packets, with columns for No., Time, Source, Destination, and Protocol Info. The packets are color-coded: orange for SIP/SDP requests, green for SIP status responses, and yellow for REGISTER requests. The bottom pane shows a detailed view of a REGISTER request (packet 45) with its message header and body.

No.	Time	Source	Destination	Protocol Info

# IMS conformance testing

## ETS phase :

- Example of test report

TEST CASE	VERDICT	COMMENT
Group 105		
105_001	P	
105_002	P	
105_003	P	
Group 106		
106_001	P	
106_002	F	No 183 received (PICS 4.7)
106_003	F	Call is rejected by REL #31, INVITE had no SDP
Group 107		
107_001	P	
107_002	F	No 183 received (PICS 4.7)
107_003	F	Call is rejected by REL #31, INVITE had no SDP
Group 108		
108_001	P	
108_002	P	
108_003	P	
108_004	P	
108_005	P	
108_006	P	
108_007	P	
108_008	P	
108_009	P	
108_010	P	
108_011	P	
108_012	P	
108_013	F	Untestable, INVITE triggers 100, REL triggers then 480
Group 108_1		
108_101	F	IAM is repeated instead of no action
108_102	P	

**END**
