RESUME

Mr. Désiré KARYABWITE is the IP (Internet Protocol) Coordinator of the E-Strategy Unit at the ITU Telecommunication Development Bureau (BDT). Since 1989, he has played a leading role in the field of technology transfer and in the Introduction of Internet/Intranet in High Technologies Enterprises in Switzerland and in several African countries. In 1997, he started to work with the ITU as Expert in Telecommunication Management Information Systems and IP-based Networks.

Today, he is managing IP activities and assisting developing countries in setting up their IP-based networks and VoIP (Voice over Internet Protocol) technology, policies and strategies. He has published several handbooks and documents on strategies relating to communication and access technologies, has participated in international panels and organized IP Telephony, e-services - applications and related events worldwide.

Before joining ITU, he was a member and President of IDM (Ingénieurs du Monde, Sector member of ITU), Internet Coordinator at Synergies Africa in Geneva, Switzerland. He also worked with Northrop Grumman, Maryland, USA, as Coordinator of “Air Traffic Management System and Radio Access project” for Rwanda, and after that as Chief Executive Officer a.i. for RITA (Rwanda Information Technology Authority).

He was born in Rwanda in December 1963. He graduated from “Switzerland Federal Institute of Technology - (EPFL)” as Electrical and Communication Engineer and he is also qualified in “Management of High Technologies” from EPFL.
