

Submission to the ITU-BDT Regional Seminar on IMT-2000 for the Arab Region

Doha, Qatar, September 29 – October 1, 2003

Session 1.3.1 CDG Activities

Title: CDMA2000: The road to next generation wireless

Presenter: Ewa Gawora
Director of Strategic Marketing
CDMA Development Group
575 Anton, Suite 560
Costa Mesa, CA 92626
USA
egawora@cdg.org

Abstract:

The presentation will highlight CDMA2000 as an IMT-2000 standard and will focus on the technology characteristics evolution path and spectrum requirements. It will identify key benefits in areas of time to market, flexibility, data rates, network capacity and product availability.

The CDG will present current status of deployments of CDMA2000 worldwide, subscriber growth, and its real-life performance in delivering advanced wireless services and incremental revenue they generate. It will include case studies from CDMA2000 operators.

The presentation will also provide a brief description of the CDMA Development Group, its mission and role in development and deployment of IMT-2000 systems.
