

Dipl.-Ing. Roland Götz, member of the board of management of LS telcom AG, studied electrical engineering and received his Dipl.-Ing. (M.S.E.E.) degree from the Technical University Karlsruhe/Germany.

From 1993 to 1998 he was with L&S Hochfrequenztechnik GmbH in various positions including that of head of Radio Network Planning Department. During this period he worked on the specification of radio network planning software, technical trainings, customer support and RF planning projects.

From 1998 to 2000 he was managing director of the new founded L&S Radio Communications GmbH performing radio network planning and consultancy services in the field of wireless communications.

Since 2000 he has been a member of the board of management of the LS telcom AG, a company providing software and service solutions in the field of spectrum management and radio network planning. At LS telcom AG he is responsible for the divisions consulting & engineering services as well as the strategic business development.
