TORSTEN SOLTMANN: BIOGRAPHY

Torsten Soltmann was born and educated in the former GDR before earning a military diploma in high frequency technologies. After serving in the East German and post-unification German air forces, he joined Siemens in 1993 as a planning engineer with responsibility for long distance transmission networks. He managed a number of projects including radio and optical transmission lines for TSL (Trans Siberian Line) – the world's longest radio transmission line. In 1998 he took responsibility for after sales service for key Siemens transmission projects in the CIS region, including Y2K planning. In 2002 he joined Siemens' mobile business as a project manager for joint UMTS trials conducted with NEC in Moscow and St Petersburg. He is currently head of Technical Sales for Siemens Mobile in Moscow.
