

**Presentation 24:** How 3GSM networks can deliver BWA – Fred Christmas (GSMA)

In the diverse world of BWA options, the GSM family of technologies are well-placed to deliver here, now. 3GSM Operators can deliver BWA under the same cost-structure as any other technology, along with the additional benefit of carrier-grade, truly global mobile voice. Regulators should not discriminate in favour of niche or untested technologies when allocating spectrum or licences, as wireless evolution has created the best global path forward - 3GSM.
