

Vadim Belyavskiy

Technical Development Director
JSC “Moscow Cellular Communications”
SkyLink-Moscow,
Russia

International 450 Association
Board member and Technical WG Chair

Vadim Belyavskiy is Technical Development Director at Moscow Cellular Communications, based in Moscow, Russia.

JSC “Moscow Cellular Communications” is a cellular network operator company that deploys and operates a CDMA450 network in Moscow and Moscow region (Oblast) under the “Skylink” brand.

Vadim graduated from Moscow Technical University of Communications and Informatics (1994) in Radiocommunications, TV- and Radiobroadcasting, Degree with Honors.

Vadim joined JSC “Moscow Cellular Communications” in 1995, with responsibility to perform a NMT450 radio network planning, design and quality supervision. Later (1999) as a head of the Strategic Development Department responsible for digitalization of NMT450 standard, he was leading the project on selection and adoption of digital technology for evolution of NMT450 networks in Russian Federation, covering issues of technology, standardization, spectrum allocation and EMC.

He is now a head of the Technical Development Department, responsible for CDMA network design, planning and development in Moscow and Moscow region, deployment of new services, technologies.

Vadim is playing one of the key roles in international CDMA450 development, working in the ITU, CEPT and other fora on 450MHz band standardization and promotion. He was for two years a Chairman of International 450 Association (2005-2007) and currently is an IA450 Board Member and Technical working group Chair and continues to work for CDMA450 promotion and success.
