

Cybersecurity, ITU-T standards and initiatives:

The presentation will review the standardization process for cybersecurity in ITU-T as part of its overall telecommunication/ICT security standardization activities - complementing the work progressed by the two other ITU Sectors, ITU-D and ITU-R and by the General Secretariat. In particular, the context of those activities will be reminded. Also, new initiatives initiated by ITU-T following WTSA-08 decisions will be introduced as well as the status of the related work.
