

**Boris Moltchanov**

received a Ing. Degree in information technologies and computer science from Politecnico di Torino (Italy) in August 1997 – Summa Cum Laude; and bachelor degree in management, marketing and world economy from Volgograd State Technical University (Russian Federation) in January 1998 – Summa Cum Laude

In 1999-2000 he held researcher position at Politecnico di Torino (Italy).

In 2000 he joined TILab (formerly CSELT) as expert of Mobile Terminals, SIM/SmartCards and Value Added Service platforms. In a moment of biggest Telecom Italia expansion in the International arena he was involved in strategy and roadmap definition for VAS and Service Platforms evolution for all international Telecom Italia's subsidiaries.

Currently he has moved step forward and is involved in definition and prototyping of disruptive services accordingly to the Research&Trends initiative of Telecom Italia. He is involved in a number of EU projects addressing innovative services.

In the last couple of years he's delivering his know-how of the Service Layer evolution performed in Telecom Italia to foreign companies within Telecom Italia's interests.

He's author of some international patents, papers and frequent speaker in various conferences, workshops and congresses as well as participant and member of some standardisation entities such as OMA and TMF.
