

**Bio-data**  
**Eric Lam**  
**Guest Speaker for Sessions 5 and 6**

Mr. Lam is a senior officer of the Office of the Telecommunications Authority (OFTA) of Hong Kong, China, which is the telecommunications regulatory body in the territory. OFTA issues operating licences for carrier and value added services. It also performs spectrum management and sets standards for telecommunications equipment.

Eric is an engineer by training. He has over 30 years experience in the telecommunication field. His main current responsibility areas include telecommunications standards, trade-in-service, anti-spamming regulations and external relations.

Eric has been participating in the telecommunication regulation/deregulation process in Hong Kong since 1980's. He has been involved in a number of telecommunications policy formulation and implementation concerning price-cap, telecommunication market liberalization, numbering plan, fixed mobile convergence and spectrum auction.
