Biography for DR Iwan Krisnadi

iwan@brti.or.id

+62-812-18 28 465

Iwan is a Commissioner at the Indonesian Telecommunication Regulatory Authority. He is a dynamic and engaging speaker with national and international audiences. A lecturer of the telecommunication management and the Telecommunication Regulation in the Post Graduate Programme of the Universitas Indonesia and the Universitas Mercu Buana. His achievements included his participation in the awakening of the Palapa Satellite Project and the operation of the Palapa Domestic Satellite System starting with the Palapa A Satellite, the Palapa B Satellite up to the Palapa C Satellite generation. He was also the team member during the satellite Launch in the USA.

He was with PT Telkom as the Marketing Manager in their project to introduce the Palapa Satellite transponder within the ASEAN member countries and the neighborhood countries to sell more transponder and exceed the company expectation. The rendezvous of the Supplier, the Manufacturer and the Operator as a satellite industry in the PALAPA USER Forum increased the business networking and establishing the mutual cooperation

Iwan earned his engineering degree in electronics from Institut Teknologi Bandung, and his MBA and PhD degrees from California Coast University.
