

ITU-D Regional Development Forum for the Asia Pacific Region

“NGN and Broadband, Opportunities and Challenges”
Yogyakarta, Indonesia, 27 – 29 July 2009

How to bridge the standardization gap

Do Xuan Binh,
**Officer, Department of Science and
Technology, Ministry of Information and
Communications (MIC), Vietnam**

Yogyakarta, Indonesia, 27-29 July 2009

Standardization gap & Digital divide

- What is the standardization gap
 - The standardization gap can be defined as **disparities** in the ability of **developing countries***, relative to **developed ones**, to **access**, **implement**, **contribute to** and **influence** international ICT standards, specifically ITU Recommendations.
 - <http://www.itu.int/ITU-T/gap>

* These include the least developed countries, small island developing states and countries with economies in transition.

Yogyakarta, Indonesia, 27-29 July 2009

2

Standardization gap & Digital divide

- The development of the “gap” is a **cause** and **manifestation** of the wider digital divide

- Deploying networks
- Providing services
- Promoting technologies
- Influencing ICT international standards

⇒ Let's share/
give assistance

for common
understanding,
applications
and interests

Yogyakarta, Indonesia, 27-29 July 2009

Roles of ITU-D

- **RESOLUTION 123 (REV. ANTALYA, 2006)**
Bridging the standardization gap between developing and developed countries

... resolves to instruct the Secretary-General and the Directors of the three Bureaux

- 1 to work closely with each other ... that assist in bridging the standardization gap between developing and developed countries;
- 2 to maintain, to the extent practicable, a close coordination mechanism among the three Sectors at the regional level through ITU regional offices;
- 3 to further collaborate with the relevant regional organizations and support their work in this area

Yogyakarta, Indonesia, 27-29 July 2009

4

Roles of ITU-D

- **RESOLUTION 47 (DOHA, 2006)** Enhancement of knowledge and effective application of ITU Recommendations in developing countries

... instructs the Director of the Telecommunication Development Bureau, in collaboration with the Directors of the Telecommunication Standardization Bureau and the Radiocommunication Bureau

- 1 to promote participation in **training courses and workshops on best-practice application of ITU-T and ITU-R Recommendations** for developing countries;
- 2 to establish a **database** containing information on new technologies that are standardized and develop **guidelines on applying ITU-T and ITU-R Recommendations.**

Yogyakarta, Indonesia, 27-29 July 2009

5

Why NGN and broadband ?

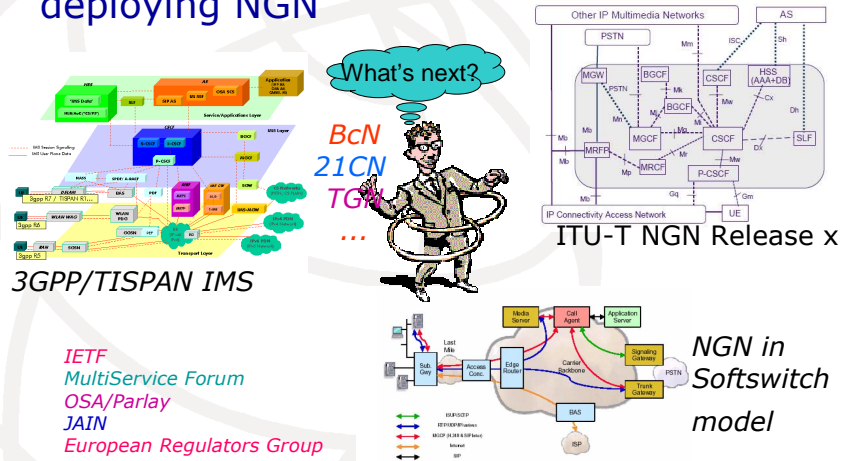

- High population in developing countries create potential demand for ICT services
- NGN and broadband for ease of expanding networks and providing new services
- Several countries in Asia-Pacific Region hold the initiative in standardizing and applying NGN

Yogyakarta, Indonesia, 27-29 July 2009

6

The fact is that...

- Many variations/ways of deploying NGN

IETF
MultiService Forum
OSA/Parlay
JAIN
European Regulators Group

Yogyakarta, Indonesia, 27-29 July 2009

7

Developing countries - Perspective

- Overall configuration and expected functions of NGN
 - Common and widely accepted
 - Fixed-mobile convergence
 - Diversity in access method but sharing common core network and control system

Yogyakarta, Indonesia, 27-29 July 2009

8

Developing countries - Perspective

- Principle for NGN structure
 - Providing data and voice services over a single telecom infrastructure
 - Supporting different access technologies
 - Distributed control system
 - Open control system
 - Providing service-neutral network infrastructure
 - Advanced security mechanism
 - Smooth and economic migration from legacy network and meet customer demands
 - Fixed- Mobile Convergence.

Yogyakarta, Indonesia, 27-29 July 2009

9

NGN – Challenges and opportunities

- NGN or not?
 - Customer, market, benefit
 - Time-to-market, life-cycle
 - Cost for network operation and maintenance
- Migration to NGN
 - Strategy/plan for migration
 - Time for migration
 - Reuse of legacy infrastructure
 - Expansion of the bandwidth
- NGN business and exploitation
 - Business strategy
 - Service marketing
 - Organizational model

Yogyakarta, Indonesia, 27-29 July 2009

Still common concerns !

10

ITU-D activities and efforts on BSG

- ITU- D trainings, workshops, seminars and regional forums for AP region

Network Infrastructure & Bridging the Standardization Gap	Venue, date
ITU/MIC Training on Bridging the Standardization Gap	Tokyo (Japan), 15-19 December 2008
ITU Regional Development Forum 2008: "Bridging the ICT standardization gap in developing countries" for the Asia-Pacific Region	Hanoi (Vietnam), 15-17 September 2008
ITU/MIC Training on Bridging the Standardization Gap	Tokyo (Japan), 18-22 June 2007
APT-ITU Workshop on NGN Planning	Bangkok (Thailand), 16-17 March 2007
ITU-BDT Seminar on Network Planning	Bangkok (Thailand), 11-15 November 2002

Yogyakarta, Indonesia, 27-29 July 2009

11

ITU-D activities and efforts on BSG

- ITU-D SG1 questions (1/2)

Question	Description
6-2/1	Regulatory impact of next generation networks on interconnection
7-2/1	Regulatory policies on universal access to broadband services
10-2/1	Regulation for licensing and authorization of converging services
12-2/1	Tariff policies, tariff models and methods of determining the costs of services on national telecommunication networks, including next-generation networks

Yogyakarta, Indonesia, 27-29 July 2009

12

ITU-D activities and efforts on BSG

■ ITU-D SG1 questions (2/2)

Question	Description
18-1/1	Domestic enforcement of telecommunication laws, rules, and regulations by national telecommunications regulatory authorities
19-1/1	Implementation of IP telephony in developing countries
20/1	Access to telecommunication services for people with disabilities
21/1	Impact of telecommunication development on the creation of employment
22/1	Securing information and communication networks: Best practices for developing a culture of cybersecurity

Yogyakarta, Indonesia, 27-29 July 2009

13

ITU-D activities and efforts on BSG

■ ITU-D SG2 questions (1/3)

Question	Description
9-2/2	Identification of study topics in the ITU-T and ITU-R study groups which are of particular interest to developing countries
10-2/2	Telecommunications for rural and remote areas
11-2/2	Examination of terrestrial digital sound and television broadcasting technologies and systems, including cost/benefit analyses, interoperability of digital terrestrial systems with existing analogue networks, and methods of migration from analogue terrestrial techniques to digital techniques

Yogyakarta, Indonesia, 27-29 July 2009

14

ITU-D activities and efforts on BSG

■ ITU-D SG2 questions (2/3)

Question	Description
14-2/2	Telecommunications for e-health
17-2/2	Progress on activities for e-services/applications in the world
18-1/2	Implementation aspects of IMT-2000 and information-sharing on systems beyond IMT-2000 for developing countries
19-1/2	Strategy for migration from existing networks to next-generation networks for developing countries

Yogyakarta, Indonesia, 27-29 July 2009

15

ITU-D activities and efforts on BSG

■ ITU-D SG2 questions (3/3)

Question	Description
20-2/2	Examination of access technologies for broadband telecommunications
22/2	Utilization of ICT for disaster management, resources, and active and passive space-based sensing systems as they apply to disaster and emergency relief situations
23/2	The unique telecommunication/ICT needs of small island developing states (SIDS)
Resolution 9	Participation of countries, particularly developing countries, in spectrum management

Yogyakarta, Indonesia, 27-29 July 2009

16

ITU State Members - AP region

- 32 developing countries
- 5 developed countries

* LDCs (13)

Afghanistan
Bangladesh
Bhutan
Cambodia
Kiribati (SIDS)
Samoa (SIDS)
Solomon Is. (SIDS)
Tuvalu (SIDS)
Vanuatu (SIDS)
Lao, PDR
Maldives
Nepal
Myanmar

* Small Island Developing States (+5)

Fiji
Marshall Islands
Micronesia
Nauru
Tonga

* Low Income States (10)

PNG (SIDS)
D.P.R. Korea
India
Indonesia
Mongolia
Pakistan
Philippines
Sri Lanka
Vietnam
[Timor Leste: non MS]*

* The Rest (9)

China/Hong Kong
Iran
Malaysia
Thailand

(Developed countries)

Australia
Japan
New Zealand
R.O. Korea
Singapore

Yogyakarta, Indonesia, 27-29 July 2009

17

Participation in ITU-D events

■ Presence of AP developing countries in ITU-D events...

- on 10 SG meetings in 2009: 8.1%
- on 4 trainings, seminars, workshops: 43.8%
- on 1 Regional forum: 50%

Yogyakarta, Indonesia, 27-29 July 2009

18

ITU-D SG outputs

■ ITU-D SG outputs...

- Reference materials and guidelines on e-services/ICT applications for developing countries <http://www.itu.int/ITU-D/cyb/>
- Guidelines on the Smooth Transition of Existing Mobile Networks to IMT-2000 for Developing Countries (GST) (under revision) www.itu.int/publ/d-stg-sg02.18-1-2006/en
- Best Practice Guidelines for the Broadband Access in Developing Countries (currently being developed) <http://www.itu.int/md/D06-RGQ20.2.2-C-0028/en>
- Proposals for revision of the Resolution 9 (under preparation) http://www.itu.int/ITU-D/study_groups/SGP_2006-2010/JGRes9/index.html
- Others (reports, draft reports, questionnaires...)

Yogyakarta, Indonesia, 27-29 July 2009

19

Ways forward...

■ Expectation of ITU-D activities

- ◆ to continue to collect views, questions, requirements of ITU Member States (especially developing countries) in the region for further study
- By conducting surveys, questionnaires, workshops, seminars, etc.
- NGN and broadband should be a great concern!
- ◆ to collaborate with ITU-R and ITU-T on standardizing NGN and broadband networks
- ◆ to collaborate with regional standard organizations and fora (e.g. ASTAP), toward common standards
- ◆ to allocate more fund to support developing countries (for trial projects in developing countries, fellowship for participants to ITU-D SG meetings)

Yogyakarta, Indonesia, 27-29 July 2009

20

Bridging the gap - How?

- ITU-D Regional Office:
 - to notify Member States of ITU-D outputs, on a regular basis and by using appropriate means such as online and free access database, sending liaison to Member States contact points, etc.
 - to collaborate and support members in holding ITU-D SG meetings in developing countries in order to facilitate the attendance of developing countries; teleworking could be encouraged.

Yogyakarta, Indonesia, 27-29 July 2009

21

Bridging the gap - How?

- Member States and industry:
 - to join ITU-D events, raise positions and share experiences for the common benefit of developing countries
 - to encourage industry to assist developing countries
 - in conducting consultation programs focused on potential technologies
 - in developing guidelines on how to apply ITU-T Recs. with particular emphasis on practical issues

Yogyakarta, Indonesia, 27-29 July 2009
