

**17:45 — 19:45, SESSION 7: NGN and Broadband: Policy and Regulatory Issues**

“Trends of the Radiocommunication regulatory framework”, **Christoph Legutko (Intel)**

**Abstract: Spectrum Regulation for Broadband**

Ubiquitous and fast Internet access is a current customers' requirement. The presentation discusses the rights of urban and rural citizens to get the same Internet access and the applications driving data throughput requirements. The available spectrum for MBWA and the European decisions for the 2.5 GHz band are also discussed. Further aspects of the presentations are the recommendations for the BB regulatory framework and some European examples for best regulatory practice.
