The International Testing Center project

Mr. Denis Andreev

Director of Technopark ZNIIS,
Rapporteur of Q.10/11 SG11 ITU-T

The real NGN testing at this time are very interesting and is actual topic of duties of exist service providers and operators around the world. The ITTC is a first project of ITU for organized experts wide world around problem regarding NGN testing. On the exist situation under ITTC responsibility a lot of results are achieved. Some experience around testing for CIS region was got and this is one of example of activity around the Global Interoperability tasks which are pointed in Resolution 76 WTSA-08.
