

Outcome of WTSA-08 Resolutions: the Resolution 76

Abstract: WTSA-08 approved resolutions to guide the work of the ITU-T sector in the years 2009 - 2012. New Resolution 76 addresses concerns from developing countries related to compliance of products to international standards. The presentation, after a short introduction on conformance and interoperability matters, will address Res. 76, provides an overview of the actions put in place by TSB to address the various issues represented in Res. 76 such as Conformity Assessment and Interoperability of products and services, testing laboratories, accreditation and certification.

Moreover it presents the ITU-T programme for testing and an approach to establish a voluntary ITU mark scheme aimed at giving visibility to those vendors that prove their products conform to ITU-T Recommendations.
