

**ITU-D Regional Development Forum for the EUR and CIS Region
NGN and Broadband, Opportunities and Challenges
Chişinău, Moldova, 24 - 26 August 2009**

Author: John Visser, Chairman, TSAG

Session 8: Services and Applications offered by NGN and Broadband

Voice Evolution and Fixed-Mobile-Internet Convergence

The way voice services are provided is changing. The role of mobile services vis-à-vis fixed services is changing. The way Internet access is provided is changing. There has been and there is ongoing tremendous evolution in both access and core infrastructure. The essential common factor is the convergence of all types of traffic, and how this changes the entire game, necessitating a fresh look at the rules applied to the game.
