

ITU Regional Development Forum on NGN and Broadband in Moldova, 4 – 6 May, 2010.

- "Next generation network planning. Methodological aspects" (Part 1)

Abstract Transition towards Next Generation Network (NGN) demands considerable capital expenditures. In addition, this process takes a long time. For these reasons, methodological aspects of the NGN planning have to be elaborated. Some of these aspects are discussed.

- "Next generation network planning. Computer-oriented methods" (Part 2)

Abstract NGN (Next Generation Network) planning is complicated problem. A number of new tasks have to be solved. Some of modern tasks related to the network structure and teletraffic engineering are considered.
