Speaker:	Mr. Wayne Zeuch ITU Consultant
Session	**S3-12: Building Testing Labs (cont)**
Title of Presentation:	Test Suite Development and Selection for ITTC Conformance and Interoperability Testing

This presentation discusses the availability of test specifications to be used in the conformance and interoperability testing processes of the proposed Regional Test Centers. Test-related documentation (i.e., PICS, Test Suites, PIXITs, Abstract Test Suites) are being developed by the ITU and other sources for specific standards. The presentation looks at the current state of test specification availability and the need for the selection and creation of new specifications to be utilized in Regional C&I Test Centers.
