

Dear Delegate,

Welcome to Uganda otherwise known as “The Pearl of Africa”. The Uganda Communications Commission warmly welcomes you to Uganda. We hope you will have a memorable visit. In this manual we have endeavoured to give you as much information as possible for a non-Ugandan on a visit.

IMPORTANT INFORMATION

The Republic of Uganda is located in East Africa and lies astride the equator. It is land-locked and bordered by Kenya in the East, Tanzania in the South, Rwanda in the Southwest, Democratic Republic of Congo in the West and Sudan in the North. The country has a surface area of 241,039 square kilometres and divided administratively into decentralised districts. The Time Zone is: Greenwich Meridian Time (GMT) + 3. Uganda’s population is 33 million (2010 estimates). Females constitute 12.5 million and males 12.1 million, with the youth being the majority. The country is governed under a multiparty system of governance.

CLIMATE AND VEGETATION

Uganda enjoys a tropical climate, with abundant sunshine all year round. Uganda's temperatures are moderate throughout the year. In Kampala, near Lake Victoria, average daily temperatures range from 18° to 28° C (65° to 83° F) in January and from 17° to 25° C (62° to 77° F) in July. The rainy seasons occur from March through May and from October through November.

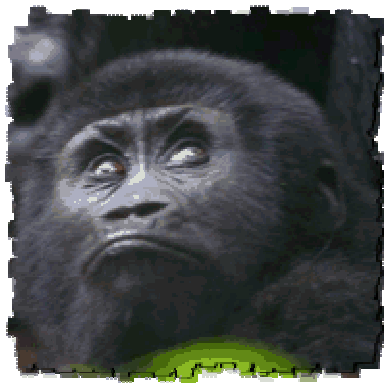

TOURIST ATTRACTIONS

Wildlife:

Uganda's beauty, wildlife diversity, and friendly people justify its reputation as *"The Pearl of Africa"*. The habitats are immensely varied and Uganda is one of the most biologically diverse nations on the Continent: primeval forest, rain forest, snow-capped mountains, savannah, crater lakes and volcanoes.

Uganda is home to the source of the Nile. It is also home to more than 1,000 species of birds, and there are more species of primates than you will see anywhere else in the world. It is in Uganda that the greatest percentage of Mountain Gorillas and Chimpanzees remain, with many other mammal species representative of both East and Central Africa.

Gorilla Tracking

Uganda is the only country where the endangered Mountain Gorilla can be seen in its natural habitat and we organise expeditions through the Bwindi Impenetrable Forest in the South of the country to search for this magnificent species and Parc de Nationale in the Virungas

Bird Watching

Uganda is one of the best bird watching destinations with an excellent Tropical climate and lies in the Albertine Rift region. A tiny landlocked country supporting more than 1000 species, Uganda deserves its reputation as "birders Eden". A short trip here to soak up the bizarre and mind blowing shoebills at Mabamba, Murchison falls or Albertine Rift endemics at Bwindi National Park is incredibly rewarding. Uganda is a superb destination for rainforest fanatics and those in search of rare elusive species.

Ugandans are known for their hospitality and friendliness towards each other and visitors alike. Although all Ugandans are very helpful it is always advisable to be cautious when dealing with strangers. Police officers are very helpful and are easily identified by their uniforms and although some may be plain-clothes police. Like everywhere in the world valuables should always be safeguarded or left in the hotel safe box. If you do not know where to obtain a certain service or you are not sure always contact the Hotel Information Desk.
