

Biography – Andrew Kwan

Andrew Kwan is an electrical engineer and is presently working as a telecommunications consultant. He had worked in the telecommunications industry for over 40 years both in the private and public sectors. He was engaged in the research and development of digital subscriber lines, packet switches and digital switching systems at Bell Northern Research. His work with Industry Canada was focused on telecommunication regulations and procedures and the negotiation and implementation of Mutual Recognition Agreements for telecommunications equipment. He chaired the telecom MRA Task Force of APEC Tel Working Group and the MRA Working Group of CITEL. He holds B.Sc and M.Sc degrees from the University of Manitoba, Winnipeg, both in electrical engineering.
