

Profile

Name: **Lu Zhao**

Age: 24

Sex: Female

Year of participation: Youth Forum Asia 2002 & YES 2003

Country of origin: China

Country of Study: U.S.A

Profession: Student

University: Illinois Institute of Technology

Field of Study: Computer Engineering (CPE)

Degree: M.S.

Ms. Lu Zhao (Alumni of Youth Forum Asia 2002 & YES 2003) is currently studying her Master degree in Computer Engineering in Chicago, USA.

She first learned about the ITU-Telecom Youth Forum from University of Electronic Science & Technology of China, where she was studying her B.S. degree at that time. Ms. Lu Zhao regarded it as a great opportunity to broaden her view towards the world as well as to know young people from other countries. Therefore, she applied for and participated in ITU-Telecom Youth Forum in 2002, from where she got the chance to know the YES Scholarship.

What impressed her most during her participation in 2002 Youth Forum was that she obtained the new knowledge of both cultures and technologies. After going back, Ms. Lu Zhao published an article in her university's newspaper in order to introduce ITU and its activities to other students.

One year later, in 2003, through the ITU Youth Programme, she won a YES Scholarship, which helped her to pursue her Master degree in computer engineering and made her dream come true.

“If you are interested in this particular activity, don’t hesitate just go for it. Never miss such a chance! YES for YES!” Said Ms. Lu Zhao.
