

# Profile

Name: **Stephan Sseruyange**

Age: 23

Sex: Male

Year of participation: YES 2004

Country of origin: Uganda

Country of study: United Kingdom

University: St. Patrick's International College

Department: Computing

Field of study: Computing and Information Systems

Degree: BSc Hons

Mr. Stephan Sseruyange (Alumni of YES 2004) is currently studying for the BSc Computing and Information Systems in London, UK. He was awarded YES Scholarship in 2004.

In January 2004, Mr. Stephan Sseruyange was at the point to make decision what to do after completing his advanced diploma. He knew his chances to get higher degree were limited given his family's financial constraints. So he searched through Internet for any scholarship that could help. Then he got to the ITU's website. He emailed to enquire further information regarding the scholarship. The quick and positive response he received from ITU, next to his great interest in ICTs, encouraged him to apply for it.

With the help of YES Scholarship, Mr. Sseruyange could continue his studies.. Meanwhile, he gained new knowledge about the different

technologies and related topics in the ICTs field. These all broaden his mind and widen his views, which will be an asset not only for his own professional career but also for his community where he wants to return to and apply his knowledge in.

***“I feel so grateful to ITU YES Scholarship Scheme, which offers such tremendous benefits to the young people interested in continuing their studies in telecommunications and related fields.”*** Said Mr. Stephan Sseruyange.
