

# ITU-T IPv6 Workshop

## Abstract

Geneva, 22 – 23 June 2005

---

Speaker: Yves Poppe  
Teleglobe

Session: 1.3: IPv6 Real-Life ISP Deployment

Title of Presentation: IPv6 and the p2p internet  
Uncharted territories of revenue opportunities?

---

A telecom industry coming out of a major recession, object of relentless technological change and pressure on existing business models, subject to changing regulatory environments, and desperate to regain some stability and renewed revenue growth

A quasi-universal consensus that the next multibillion revenue opportunities imply **IP based network convergence, multi-functional end-devices, always on, always reachable, mobility, QoS and end to end security.**

Angst of the implications of a New Telecom World where everybody and everything communicates on one converged universal network...
