

ITU-T IPv6 Workshop

CV

Geneva, 22-23 June 2005

LOUIS POUZIN
EUROLONC, FRANCE

Session: 1.4 Ipv6 Resource Management

Louis POUZIN is one of the pioneers in computer communications. He designed and directed the development of the Cyclades network in France, the first to use datagrams and matching end-to-end protocols, later adopted by internet. He is now retired and contributes to several associations and working groups related to internet development. He received the IFIP Silver Core, the ACM SIGCOMM and the IEEE Internet awards. He graduated from Ecole Polytechnique in Paris, and has published 82 articles and a book on computer networks.
