

ITU-T NEXT GENERATION NETWORKS WORKSHOP IN COLLABORATION WITH IETF

CV

Geneva, 1 – 2 May 2005

Brian W Moore
MSc BSc CEng FIEE

Opening Session

Brian Moore has been working in the telecomms standardisation field for over thirty years and has held many chairmanships in CEPT, ETSI and the ITU in the area of network standards. He has been involved in standards development for data networks, signalling systems, the ISDN and IP-based networks. He was earlier involved in Study Group 7 (VII), Study Group 11 (XI) where he led the Signalling System No 7 Experts Group and Study Group 18 (XVIII) where he was chairman of the Signalling Working Party. He is currently chairman of ITU-T Study Group 13 dealing with general aspects of multiprotocol networks including IP-networking, network architectures, performance and interworking. The Study Group has also been the focal point in the ITU-T for IP-related studies and for the standardisation of the Global Information Infrastructure and Next Generation Networks.

Brian, after a career of over thirty years with British Telecom, has for the last seven years, been a consultant to Lucent Technologies.
