ITU-T Workshop
# "New Horizons for Security Standardization"

CV

Bill McCrum

Deputy Director General of Spectrum Engineering in the Canadian Department of Industry

Session: **1:The role of standards in telecommunications and IT security**

Title of Presentation: **Security standardization in an evolving threat environment**

Bill McCrum has an Honours Bachelor and Masters Degree in Electrical Engineering from the Queen's University of Belfast. He is presently Deputy Director General, Spectrum Engineering in the Canadian Department of Industry. His responsibilities include telecommunications regulation, post market surveillance, network vulnerability analysis and investigations, and implementation of telecom aspects of various Trade Agreements with Canada's major trading partners. He is Executive Secretary of the ICT Standards Advisory Council of Canada (ISACC), and is chair of Canada's preparatory committees to CITEL/PCC.I, ITU-T Study Groups 2 and 17. Bill has co-authored a technical book on network interconnection issues and published a wide range of technical papers on data communications issues.
