

ITU-T Workshop

“New Horizons for Security Standardization”

CV

Geneva, 3 –4 October 2005

Michel LEBER

Senior Marketing Manager
TEKELEC France

Session: **7: Overview of some specific areas of current interest for security standardization**

Title of Presentation: **SS7 and the vulnerability of the networking infrastructure**

He started his career as R&D engineer, then Project Manager in developing hardware & software for telecommunications test equipments. After 1.5 year marketing cycle in continuing education, he launched as Product Manager several ranges of test equipment, including for ISDN & SS7. In position of Marketing Manager, he defined & launched in 1995 an innovative SS7 network monitoring system chosen by many wireline & wireless Service Providers worldwide for Traffic & Service management.

Michel LEBER is contributor since 1997 in ITU/QSDG and since 2002 in ITU Study Group 2. He has been involved in discussions on Fraud & Security impact on Quality of Service. He was speaker in various events & has written articles in international telecom magazines. He has a worldwide international experience of over 20 years and is currently in charge of monitoring solutions for VoIP and NGN.
