

ITU-T Workshop

Video and Image Coding and Applications (VICA)

BIO

Geneva, 22-23 July 2005

Stephan Wenger
Nokia/Finland

Session: 1: Network platforms
Title of Video and image coding in mobile networks
Presentation:

Dr. Stephan Wenger, born in 1965, is a Principal Scientist at the Nokia Research Center, working on visual coding and transport technologies and standards. He also holds a position as an Adjunct Professor at the Technical University Tampere, Finland. Prior joining Nokia, Dr. Wenger acted as Assistant Professor in the EECS department of the Technical University Berlin. He also, as an independent consultant, advised a number of companies including Teles AG, Polycom, Siemens, Microsoft, and Intel. He serves on the Board of Directors of UB Video Inc, and on several advisory boards.

Dr. Wenger's interests are in protocol design and media coding. He has authored or co-authored journal and conference publications, standardization contributions, Internet RFCs, and book chapters. He is also active in the IETF and recently in 3GPP. Dr. Wenger received the Dipl.-Inf. and Dr.-Ing. degrees in Computer Science from Technische Universität Berlin, Germany, in 1989 and 1995, respectively
