

**Ms Donna Bethea Murphy**

Donna Bethea-Murphy is Senior Vice President of Global Regulatory for Viasat, previously Inmarsat. In this capacity she leads the company's telecommunications and development regulatory policy activities. She has been appointed to the Federal Communication Commission's (FCC) Technical Advisory Committee, and National Telecommunications and Information Administration's CSMAC and is a Focal Point on the Broadband Commission for Sustainable Development. She was previously Chair of the FCC CSRIC Working Group on Satellite Cyber Guidelines, as well as past Chair of the USITUA Board. She served as Vice Chair and Founding Member of the ITU Smart Sustainable Development Model Initiative Board.

Preceding Inmarsat, Ms. Bethea-Murphy was Vice President of Regulatory for Iridium where she led all of the company's global regulatory activities, including those related to policy, standards, licensing, International Telecommunication Union (ITU) and spectrum. She was previously Senior Director of Spectrum Policy at PanAmSat Corporation. Prior to joining PanAmSat, she was Director of Technology and Regulatory Affairs for AirTouch Communications, where she developed and implemented technical regulatory policy for terrestrial wireless services. Prior to her position at AirTouch, she was responsible for international and domestic spectrum policy at the FCC. She holds a BS in Electrical Engineering from Clemson University.
