

Helen is part of the Amazon Kuiper International Regulatory Affairs team. She works with national administrations and regional associations in Sub-Saharan Africa to ensure that affordable and reliable satellite broadband services will reach populations that are not adequately covered by the available services. Previously, at Access Partnership, Helen advised telecommunications companies on technology policy and regulation to enable them to efficiently access global markets. Prior to that, at Ofcom, the United Kingdom regulator, she helped develop Public Policy, notably contributing to research on the possibility of Open Communications and on the needs of broadband users in the UK. Helen was a long-time regulator in Uganda, helping to advise on national ICT policy, managing radio spectrum, developing licensing frameworks and designing and implementing projects for the Ugandan rural access programme. Her background is in Electrical engineering with specialisation in telecommunications.
