

Dr. Evanny Obregon

Evanny Obregon is a Strategic Product Manager at Ericsson. She is responsible for driving RAN product strategy development for 3GPP Non-Terrestrial Networks within Ericsson Networks organization as well as external alignment with NTN ecosystem. Within her role, she also drives NTN strategy execution including initial requirements definition, feature development, market introduction and product evolution plans.

Evanny has been at Ericsson ten years working across 3GPP standardization, European and Global spectrum regulation as well as product design and strategy. Before joining Ericsson, Evanny was a Researcher in Wireless@KTH Research Centers in Wireless Communications within KTH where her work focused on Spectrum Sharing and Interference Management.

Evanny received her M.Sc. and Ph.D. degrees in Wireless Systems from KTH Royal Institute of Technology, Sweden.
