

About Patrick APARY

Have vast years of experiences in Cellular Mobile Networks, and Telecommunications/ICT operations streamlining.

This experience has been in steadily increasing roles of responsibility that includes deploying solutions, managing projects and teams' lead.

I served in various key technical roles on planning, designing, and managing, while gathering and disseminating information of all activities taking place in the business operations.

I use technology to improve the lives of those in need, and I develop innovative approaches and best practice frameworks to underpin decision-making.

I offer a vision-driven approach to digitalizing organizations through prioritizing strategic innovation, business transformation, strengthening stakeholder engagement, collaboration, and leveraging technology for common good of public.
