

## **Shanar Tabrizi**

Climate Technology Expert, World Intellectual Property Organization (WIPO)

Ms. Tabrizi is an environmental engineer with a MSc in Sustainable Technology from the Royal Institute of Technology in Sweden. She has nearly a decade of experience with research, advocacy and knowledge management related to climate change and technology in an international setting. Currently a climate technology expert at the World Intellectual Property Organization (WIPO), she has previously served as a technical consultant and policy advisor with various UN and EU organizations, including the UNFCCC Climate Technology Center & Network (CTCN). With an academic background in industrial ecology, her knowledge is particularly centered around technologies for industrial decarbonization and circular economy. She is the main author of the WIPO Green Technology Books published in 2022 and 2023, which map more than 700 climate mitigation and adaptation technologies, highlighting the role of innovation to respond to climate challenges. She is currently writing the next edition, on energy technologies.
