

Fryderyk Lewicki

Fryderyk Lewicki received MSc and PhD degrees from the Wroclaw University of Technology (Poland). He is also a graduate of several telecommunication programs provided by the United States Telecommunication Training Institute in Washington DC (1990-1992). Since 1985 he joined the Orange Labs Poland where he is expert on Antennas, Radiowave Propagation and EMC. He is Orange Expert Senior in Energy & Environment. He is Chairman of the ITU-T SG5 WP1/5 “EMC, lightning protection and EMF” and for the fourth term the Rapporteur for Question 3/5 “Human exposure to electromagnetic fields (EMFs) from information and communication technologies (ICTs)”. In the ITU-R SG3 “Radiowave propagation” he is chairman of the Sub Working Group SWG 3K-2 “Path general propagation method”. He is also Past chair of the Polish Chapter of the IEEE EMC Society. He is also active in IEC TC106 committee. The main fields of his activity are: antenna systems, protection against electromagnetic radiation, spectrum management, electromagnetic compatibility and radiowave propagation. He is author and coauthor of about 90 technical papers and 5 patents.
