ANNEX 2

Title and summary of the draft Recommendation(s) proposed for adoption at the Study Group 1 meeting

Working Party 1A

Draft modification of Recommendation ITU-R SM.329-10

Doc. 1/95(Rev.1)

Unwanted emissions in the spurious domain

Summary

This draft modification of Recommendation ITU-R SM.329-10 proposes the revision of the emission limits for Category Z limits, radiation limits for Information Technology Equipment (ITE) specified by the International Special Committee on Radio Interference (CISPR) (Table 6 of the Recommendation), mainly in order to add limits above 1 GHz.

Draft modification of Recommendation ITU-R SM.1541-2

Doc. 1/101

Unwanted emissions in the out-of-band domain

Summary

This draft modification of Recommendation ITU-R SM.1541-2 is to revise its Annex 5 in order to:

- remove references to a deleted ITU-R Question;
- reflect the changes made to the ITU-R structure – change in the naming of the groups as well as the responsibilities;
- clarify what is meant by “unwanted emissions in the OoB domain” in the title of this Recommendation;
- remove the example of use of the OoB domain emission attenuation mask in conjunction with spurious domain emission attenuation provided in Appendix 3 of the Radio Regulations for space services (earth and space stations).

The impact of power line high data rate telecommunication systems on radiocommunication systems below 30 MHz

Summary

This Recommendation provides a summary of the protection criteria of radiocommunication services below 30 MHz with regard to interference by an aggregate of power line telecommunication (PLT) systems. Details on interference considerations below 80 MHz are contained in Report ITU-R SM.2158 on the impact of PLT systems on radiocommunication systems operating in the LF, MF, HF and VHF bands below 80 MHz. Some administrations have adopted or are in the process of adopting national regulations including technical and operational restrictions that may have been derived using a variety of parameters and/or methodologies, taking into account, in particular, specific national deployment scenarios and technical characteristics, as well as other considerations. Examples can be found in Annex 2 to the Recommendation.
