Indicates the status of the affected networks:

- A: Recorded into the MIFR or the coordination request published, or
- T: Still under technical examination.

Indicates whether:

- N: The existing network is in the notification stage, or
- C: The existing network is in the coordination stage.

For deltaT/T cases, indicates that:

- C: The existing network causes interference to the incoming network, and/or
- R: The existing network receives interference from the incoming network.

1. A = Réseau inscrit dans le Fichier de référence international des fréquences ou pour lequel la demande de coordination a été publiée / Network in MIFR or for which coordination request has been published / Red del Registro o aquella para la que se ha publicado la petición de coordinación

**Description**

Indicates the status of the affected networks:

- A: Recorded into the MIFR or the coordination request published, or
- T: Still under technical examination.

Indicates whether:

- N: The existing network is in the notification stage, or
- C: The existing network is in the coordination stage.

For deltaT/T cases, indicates that:

- C: The existing network causes interference to the incoming network, and/or
- R: The existing network receives interference from the incoming network.

E.g. ARABSAT-KA-14E (existing) only receives interference from KOREASAT-123.7KA (incoming).  
EUROPE\*STAR-1K (existing) receives and causes interference from / to KOREASAT-123.7KA (incoming).

For coordination arc cases, indicates which of the existing network has been identified under the coordination arc approach.

E.g. WEST-GEO-H (existing) has been identified under both the coordination arc approach and deltaT/T, which indicates that coordination requirement is triggered through some combination of frequency assignments between WEST-GEO-H (existing) and KOREASAT-123.7KA (incoming) by the coordination arc approach and other combination of frequency assignments by deltaT/T.

1. A = Réseau inscrit dans le Fichier de référence international des fréquences ou pour lequel la demande de coordination a été publiée / Network in MIFR or for which coordination request has been published / Red del Registro o aquella para la que se ha publicado la petición de coordinación  
T = Réseau en cours d'examen / Network under examination / Red en examen
2. N = Réseau au stade de la notification / Network in notification stage / Red en etapa de notificación  
C = Réseau au stade de la coordination / Network in coordination stage / Red en etapa de coordinación
3. C = Réseau causant des brouillages à KOREASAT-123.7KA / Network causes interference to KOREASAT-123.7KA / Red que causa interferencia a KOREASAT-123.7KA
4. R = Réseau auquel des brouillages sont causés par KOREASAT-123.7KA / Network receives interference from KOREASAT-123.7KA / Red que recibe interferencia de KOREASAT-123.7KA
5. A = Réseau dans l'arc de coordination / Detected by coordination arc / Arco de coordinación detectado

Provides a brief description to the various columns of the table. The name of the incoming network is also provided here.
