Circular Letter
CR/344

4 February 2013

To Administrations of Member States of the ITU

Subject: BR International Frequency Information Circular (BR IFIC) - Terrestrial Services - New format

Reference: Circular Letter CR/332 dated 24 April 2012

To the Director General

Dear Madam/Sir,

In Circular Letter CR/332 of 24 April 2012, the Radiocommunication Bureau informed administrations of its decision to update the software and database container of the BR IFIC (Terrestrial Services).

Since edition No. 2719 of 15 May 2012, an additional DVD containing the beta version of the BR IFIC (Terrestrial Services) in its new format, using the SQLite database management system, has been distributed along with the regular BR IFIC DVD, for assessment by administrations and all subscribers.

After several months of successful testing, the BR IFIC (Terrestrial Services) in its new format was presented and used for the workshops during the World Radiocommunication Seminar 2012 (WRS-12), and the overall feedback was extremely satisfactory.

Consequently, the Bureau hereby informs you that, as from the publication of BR IFIC No. 2739 of 5 March 2013, the former BR IFIC (Terrestrial Services) publication on DVD, based on the Microsoft Access® database, will be discontinued and replaced by the new one using the SQLite database management system.

The Bureau remains at the disposal of your Administration for any clarification you may require with respect to this subject.

Yours faithfully,

François Rancy
Director, Radiocommunication Bureau
