

Radiocommunication Bureau (BR)

Circular Letter
CR/435

28 August 2018

To the Administrations of ITU Member States and ITU-R Sector Members

Subject: Submission of interference reports using the Web-based application “Satellite Interference Reporting and Resolution System” (SIRRS)

Reference: BR Circular Letter CR/428 dated 13 March 2018

Following the successful testing of the trial version by administrations and the Radiocommunication Bureau, as indicated in Circular Letter CR/428, the Bureau is pleased to provide administrations with the operational version of the application “Satellite Interference Reporting and Resolution System” (SIRRS), which enables administrations to report and exchange information concerning harmful interference affecting space services.

As from 1 September 2018, formal submissions of reports and subsequent exchange of information concerning cases of harmful interference affecting space services can be carried out through the SIRRS online application, which may be found in the Space Services Department Website or at the following link:

<https://www.itu.int/en/ITU-R/space/SIRRS/Pages/default.aspx>

Submission of documents by email (brmail@itu.int) or fax (+41 22 730 5785) will continue to be accepted in cases of difficulties to have access to the system, or if consideration by the Radio Regulations Board is requested.

Informal submissions sent during the trial period have been discarded. The Bureau wishes to thank Administrations, Satellite Operators and Space Agencies that have registered in the system and participated in the tests. Users from Administrations, Satellite Operators and Space Agencies registered during the trial period are kept for official use as from 1 September 2018.

The Bureau would like to invite those Administrations and operators that have not yet opened their account to proceed with the registration as indicated in the Circular Letter CR/428 and SIRRS website.

A dedicated email address (SIRRS@itu.int) is also available for questions, suggestions or any difficulty to be resolved.

The Bureau trusts that your Administration will take the maximum benefit of the use of this online application and remains at your disposal.

A handwritten signature in blue ink, consisting of a stylized 'F' followed by a cursive 'R' and 'A'.
