Subject: Application of **Nos.11.44/11.44.1** of the Radio Regulations to satellite networks with the 9-year expiry date for notification between 1 January and 30 June 2005

Dear Sir,

1. The Radiocommunication Bureau hereby draws the attention of all administrations to the application of provisions of **Nos. 11.44** and **11.44.1** of the Radio Regulations to satellite networks with APIs received before 22 November 1997, whose 9-year period for submission of notification expires between 1 January and 30 June 2005.

2. These provisions stipulate that the assignments included in a request for coordination shall no longer be taken into account by the Bureau or administrations unless, by the end of the nine-year regulatory period as from the date of publication of the relevant advance publication information (API), for APIs received before 22 November 1997:

- the assignments in question have been brought into use,
- the complete first notice for recording of these assignments under No. 11.15 has been received by the Bureau.

3. In this context, the Bureau has prepared two lists of networks with an indication of their respective API date of publication and respective nine-year regulatory period expiry date, which falls between 1 January and 30 June 2005, as follows:

- Annex 1 contains the list of networks for which no notification information seems to have yet been received by the Bureau, with an indication where the Bureau does not seem to have yet received the "due diligence" information;
- Annex 2 contains the list of networks for which notification information, having been received, was returned to the administration as the result of an unfavourable finding and/or may not cover all the frequency assignments included in the request(s) for coordination, as well as with an indication where the Bureau does not seem to have yet received the "due diligence" information.

Please note that satellite networks with API received between 1 January and 30 June 1998, for which the 7-year expiry date for notification falls between 1 January and 30 June 2005, were dealt with in Circular Telegram CTITU A44 sent on 8 July 2004.

4. The Bureau requests your Administration to kindly verify the attached lists and submit the notification information under No. 11.15 before the indicated expiry of the 9-year period, either with all the required agreements obtained (No. 11.32), or with certain agreements still missing, but with a request to apply the provisions of Nos. 11.32A, 11.35 or 11.41, as appropriate.

5. Your Administration is also kindly requested to check further whether any of its networks, not listed in the Annexes, also fall into the above category and, if so, to submit the notification information as mentioned in paragraph 4 above for the corresponding assignments still at the coordination stage and for which the nine-year regulatory period will expire between 1 January and 30 June 2005.

6. The attention of your Administration is also drawn to the fact that, for the networks identified with an "X" in the Annexes, the Bureau does not seem to have received the "due diligence" information, which, for networks subject to *resolves* 2 and §1 of Annex 1 to Resolution 49 (Rev.WRC-03), is to be provided before their respective date of bringing into use and in any case by 21 November 2004 at the latest (with respect to this, the BR sent telefaxes to the concerned administrations during 2nd half of June 2004).

7. For networks for which the "due diligence" information has already been received, your Administration is also kindly requested to check whether its networks contain frequency assignments in frequency bands not covered by that "due diligence" information and, if so, to submit the complete "due diligence" information before the expiry of the relevant deadlines indicated in paragraph 6 above.

8. Please note that this communication is to be considered as the Bureau's advance notice referred to in Nos. 11.44/11.44.1.

9. The Bureau trusts that your Administration will provide the required information as indicated above. In the event that the assignments are not brought into use and the notification information as well as the "due diligence" information are not received by the Bureau within the relevant periods, the Bureau will initiate the cancellation of the relevant assignments as foreseen by Nos. 11.44/11.44.1 and the related Rules of Procedure and/or Resolution 49 (Rev.WRC-03), according to the case.

Yours faithfully,

Avram Sion
Head, Space Systems Coordination Division

Enclosures: Annexes 1 and 2

ANNEX 1

Satellite networks for which the Bureau does not seem to have yet received the notification information and for which the nine-year regulatory period will expire before 1 July 2005
