Very late submission by the administration of the Russian Federation to the RRB

Dear Sir,

The Administration of Luxembourg has considered serious concerns regarding the very late contribution to the RRB, sent on the 13th of July by the Russian Federation, requesting an extension of the regulatory time-limit to bring into use the frequency assignments to the ENSAT-23E satellite network.

Due to the very late submission (19 days after the deadline to submissions), the administration of Luxembourg is not in the position to comment on their request prior to the discussions at the RRB being held this week.

Therefore, the Luxembourg administration kindly requests the Director of the BR to inform the RRB of the extreme concern expressed by the Administration of Luxembourg, and of their adamant request to postpone any discussions on this topic to the next RRB meeting, in order to enable sufficient time for the Luxembourg administration to provide comments on this specific submission.

Best regards,

On behalf of Institut Luxembourgeois de Régulation

Claude RISCETTE
